Convergent Media and Privacy Tim Dwyer, 2015-10-19 A lot of personal data is being collected and stored as we use our media devices for business and pleasure in mobile and online spaces This book helps us contemplate what a post Facebook or post Google world might look like and how the tensions within capitalist information societies between corporations government and citizens might play out

The Rhetorical Invention of America's National Security State Marouf Hasian Jr., Sean Lawson, Megan D. McFarlane, 2015-07-29 The Rhetorical Invention of America's National Security State examines the rhetoric and discourse produced by and constitutive of America's national security state Hasian Lawson and McFarlane illustrate the importance of rhetoric to the expansion of the American national security state in the post 9 11 era through their examination of the global war on terrorism enhanced interrogation techniques drone crew stress activities of Edward Snowden rise of Special Forces and popular representations of counterterrorism The coauthors contend this expansion was not the result of lone imperial executives or a nefarious state within a state but was co produced by elite and non elite Americans alike who not only condoned but also in many cases demanded the expansion of the national security state This work will be of interest to scholars in communication studies and political science

Jordan and the Arab Uprisings Curtis R. Ryan, 2018-06-26 In 2011 as the Arab uprisings spread across the Middle East Jordan remained more stable than any of its neighbors Despite strife at its borders and an influx of refugees connected to the Syrian civil war and the rise of ISIS as well as its own version of the Arab Spring with protests and popular mobilization demanding change Jordan managed to avoid political upheaval How did the regime survive in the face of the pressures unleashed by the Arab uprisings What does its resilience tell us about the prospects for reform or revolutionary change In *Jordan and the Arab Uprisings* Curtis R Ryan explains how Jordan weathered the turmoil of the Arab Spring Crossing divides between state and society government and opposition Ryan analyzes key features of Jordanian politics including Islamist and leftist opposition parties youth movements and other forms of activism as well as struggles over elections reform and identity He details regime survival strategies laying out how the monarchy has held out the possibility of reform while also seeking to coopt and contain its opponents Ryan demonstrates how domestic politics were affected by both regional unrest and international support for the regime and how regime survival and security concerns trumped hopes for greater change While the Arab Spring may be over Ryan shows that political activism in Jordan is not and that struggles for reform and change will continue Drawing on extensive fieldwork and interviews with a vast range of people from grassroots activists to King Abdullah II *Jordan and the Arab Uprisings* is a definitive analysis of Jordanian politics before during and beyond the Arab uprisings

Levees and the National Flood Insurance Program National Research Council, Division on Earth and Life Studies, Water Science and Technology Board, Committee on Levees and the National Flood Insurance Program: Improving Policies and Practices, 2013-07-18 The Federal Emergency Management Agency s FEMA Federal Insurance and Mitigation Administration FIMA manages the National Flood Insurance Program NFIP which is a cornerstone in the U S strategy to assist communities to prepare for mitigate against and recover from flood disasters The NFIP was established by Congress with passage of the National Flood Insurance Act in 1968 to help reduce future flood damages through NFIP community floodplain regulation that would control development in flood hazard areas

provide insurance for a premium to property owners and reduce federal expenditures for disaster assistance. The flood insurance is available only to owners of insurable property located in communities that participate in the NFIP. Currently the program has 5 555 915 million policies in 21 881 communities³ across the United States. The NFIP defines the one percent annual chance flood 100 year or base flood floodplain as a Special Flood Hazard Area (SFHA). The SFHA is delineated on FEMA's Flood Insurance Rate Maps (FIRM)s using topographic meteorologic hydrologic and hydraulic information. Property owners with a federally backed mortgage within the SFHAs are required to purchase and retain flood insurance called the mandatory flood insurance purchase requirement (MFIP). Levees and floodwalls hereafter referred to as levees have been part of flood management in the United States since the late 1700s because they are relatively easy to build and a reasonable infrastructure investment. A levee is a man-made structure usually an earthen embankment designed and constructed in accordance with sound engineering practices to contain control or divert the flow of water so as to provide protection from temporary flooding. A levee system is a flood protection system which consists of a levee or levees and associated structures such as closure and drainage devices which are constructed and operated in accordance with sound engineering practices. Recognizing the need for improving the NFIP's treatment of levees, FEMA officials approached the National Research Council's (NRC) Water Science and Technology Board (WSTB) and requested this study. The NRC responded by forming the ad hoc Committee on Levee and the National Flood Insurance Program: Improving Policies and Practices charged to examine current FEMA treatment of levees within the NFIP and provide advice on how those levee-related policies and activities could be improved. The study addressed four broad areas: risk analysis, flood insurance, risk reduction, and risk communication regarding how levees are considered in the NFIP. Specific issues within these areas include current risk analysis and mapping procedures, behind accredited and non-accredited levees, flood insurance pricing and the mandatory flood insurance purchase requirement, mitigation options to reduce risk for communities with levees, flood risk communication efforts, and the concept of shared responsibility. The principal conclusions and recommendations are highlighted in this report.
