**E-Learning and Business Plans** Elaina Norlin, Tiffini Travis, 2008-07-25 With the invention of desktop computers electronic learning or e learning has become a convenient learning tool of choice for individuals with busy schedules For the past several years there has been a continuous stream of much needed innovation in the use of e learning

and these have now become second nature to both e learning providers and users But just as e learning has enhanced and enriched our lives challenges have increased as the creation of courses and e learning material evolve Technology although it makes our lives easier can come with a not so affordable price tag As creators of e learning content after raising money to provide a costly e learning initiative how do we know if our customers or target audience are really learning Who is going to maintain the technology Who will subsidize the upkeep costs How do we know if there is a better product on the horizon that can do it more cheaply and with more advanced technology infrastructure

E learning and Business Plans National and International Case Studies provides a comprehensive view on how to develop non profit business plans for both small and large scale e learning projects Editors Tiffini Travis and Elaina Norlin present both national and international case studies covering many elements of a typical non profit business plan and reveal the experiences individuals have had while developing their project This book will be useful to professionals non profit organizations and academic researchers who are currently considering working on large scale e learning or high cost high risk projects While many issues are library related the book is relevant to non librarians as well

*Elementary Algebra with Early Systems of Equations* Tom Carson,Ellyn Gillespie,2005-02 Tom Carson engages students in the learning process by meeting them where they are and leading them to where they need to be through the determination of their individual learning style the development of study skills and the integration of learning strategies that help each student succeed *Elementary Algebra with Early Systems of Equations* is a book for the student The authors goal is to help build students confidence their understanding and appreciation of math and their basic skills by presenting an extremely user friendly text that models a framework in which students can succeed Unfortunately students who place into developmental math courses often struggle with math anxiety due to bad experiences in past math courses Developmental math students often have never developed nor applied a study system in mathematics To address these needs the authors have framed three goals for *Elementary Algebra* 1 reduce math anxiety 2 teach for understanding and 3 foster critical thinking and enthusiasm The authors writing style is extremely student friendly They talk to students in their own language and walk them through the concepts explaining not only how to do the math but also why it works and where it comes from rather than using the monkey see monkey do approach that some books take *Elementary Algebra with Early Systems of Equations* as the title implies places the topic of Systems of Equations early in the text in Chapter 5 This organization is ideal for those instructors who prefer to teach systems of equations immediately following the chapter on graphing and the chapters prior to polynomials and factoring For those who prefer to teach the topic later *Elementary Algebra* by the same author team places Systems of Equations in Chapter 8 Foundations of Algebra Solving Linear Equations and Inequalities Problem Solving Graphing Linear Equations and Inequalities Systems of Equations Polynomials Factoring Rational Expressions and Equations Roots and Radicals Quadratic Equations For all readers interested in elementary algebra
