This volume contains a selection of 41 refereed papers presented at the 18 International Conference of Domain  
 Decomposition Methods hosted by the School of Computer Science and Engineering CSE of the Hebrew University of  
 Jerusalem Israel January 12 17 2008 1 Background of the Conference Series The International Conference on Domain  
 Decomposition Methods has been held in twelve countries throughout Asia Europe the Middle East and North America  
 beginning in Paris in 1987 Originally held annually it is now spaced at roughly 18 month intervals A complete list of past  
 meetings appears below The principal technical content of the conference has always been mathematical but the principal  
 motivation has been to make efficient use of distributed memory computers for complex applications arising in science and  
 engineering The leading 15 such computers at the petascale characterized by 10 oating point operations per second of  
 processing power and as many Bytes of application addressable memory now marshal more than 200 000 independent processor  
 cores and systems with many millions of cores are expected soon There is essentially no alternative to main decomposition as

a stratagem for parallelization at such scales Contributions from mathematicians computerscientists engineers and scientists are together n essary in addressing the challenge of scale and all are important to this conference
