## Understanding Main Ideas

The person whose finger is shown below has walked across a carpet and is about to touch the doorknob. Answer the following questions on a separate sheet of paper.

- Are the charges in the finger attracted or repelled by the charges in the doorknob? How can you tell? They are attracted; fingers = negative, doorknob = positive
- What do the lines around the finger and doorknob represent? The electric field
- One of a kind static electricity is a result of electrons moving into an object from another object. What is another way static electricity can build up in an object?

By induction, friction or conduction
