DESCRIPTION

The Electro-Voice S-1503 is a 200-watt, three-way, high-efficiency stage system. It combines professional quality components, highlighted by the VMR® vented midrange speaker, with an unusually durable Thiele-Small aligned vented enclosure. The result is clear and articulate high quality sound.

The enclosure is constructed of Road-Wood™ — a structural material made of layered and selectively oriented hardwood strands. The covering is abuse-resistant black carpeting.

The high-frequency section of the S-1503 employs the ST3508 constant-directivity tweeter featuring wide and uniform high-frequency coverage coupled with an auto-limiting protection circuit.

The midrange is the EV VMR speaker built with a high-efficiency flat wire coil and high temperature construction materials.

The bass section of the S-1503 is designed using Thiele-Small parameters for efficient performance to below 60 Hz. The 15-inch woofer used in the system is an EVX-15 unit featuring beryllium copper lead wire and an extended length, edgewound voice coil protected by the unique EV Therm Inductive Ring (TIR™). The part of the magnetic structure adjacent to the coil is insulated, using the exclusive EV PROTEF™ process. The coil is driven by a massive (16 lb) magnetic structure.
