CHAPTER 2 ELEMENTS OF THE SAMPLING PROBLEM

- 2.1 An adequate frame listing individuals in a city is difficult to obtain. For that reason, and because data is desired on a family basis, it would be better to sample dwelling units. An adequate frame for dwelling units is also difficult to obtain, so a cluster sampling approach could be used by sampling city blocks and then measuring water consumption for the families living in the sampled blocks.
- 2.2 A common way to sample trees is to divide the farm into plots and then randomly or systematically sample plots on which trees would be counted. Unless trees are planted according to a regularly spaced design, it is difficult to use the trees themselves as sampling units.
- 2.3 The sampling design depends on a careful definition of the population of interest. As it would be almost impossible to get a listing of all cars owned by residents of a city, a better option would be to restrict the population of cars to something like "cars that use city parking lots on a working day" or "cars that belong to people visiting the mall on a weekend." Then, a listing of parking lots or sections of parking lots could serve as frames for collections of cars.
- 2.4 If the number of plants is not too large, each could serve as a stratum from which employees would be sampled. In this case one would need a list of employees (a frame) for each plant. If the number of plants is large, then a sample of plants (clusters of employees) could be taken and a sample of employees (or all employees) could be interviewed in each sampled plant.
- 2.5 An area as large as a state is generally broken up into smaller areas, such as counties and farms within counties, for sampling. Each county may contain a number of farms, so there are various sampling options. Counties could be viewed as strata, with farms being sampled from each. If there are many counties, one might sample counties as clusters of farms and then sample farms from each sampled county. In either of these scenarios a list of farms by county would be needed as a frame.
