This book bridges the gap between theory and practice synthesizing research with real world examples culminating in a robust Marine Safety Management System Framework grounded in practical insights. Acknowledging the positive impact of effective management practices the primary aim of this Guide is to furnish the maritime industry with a model for implementing an Integrated Management System that addresses vital concerns suitable for use by marine companies operating various types of ships its requirements are formulated broadly to ensure applicability across diverse ship operations and management approaches. This book stems from extensive research conducted during the author's pursuit of a Bachelor of Technology (BTech) Degree in Safety Management and the empirically validated Marine Safety Management System Framework (MSMSF). The MSMSF encapsulates best practices and regulatory adherence encompassing the 13 mandatory elements of the ISM Code and providing essential tools for effective SMS procedures. Through the integration of current marine legal requirements and best practices Dr Greeff augments the body of knowledge and presents a pragmatic approach to Resilient Work Practices in the marine industry. The aim is to curtail incident frequency and accidents striving for zero harm. Drawing upon examples and case studies this book illuminates the benefits and challenges of implementing SHEQE standards in the maritime realm. By immersing themselves in this content and thoughtfully considering its recommendations organizations can adopt the MSMSF or develop an effective in-house Resilient Work Practice Framework.
