COMMUNICATION MATTERS . . .

"Writing, communication skills, and organizational skills are scarce everywhere. These skills are in demand across nearly every occupation—and in nearly every occupation they're being requested far more than you'd expect based on standard job profiles. Even fields like IT and engineering want people who can write."
—*The Human Factor: The Hard Time Employers Have Finding Soft Skills*, Burning Glass Technologies

Burning Glass Technologies continually studies the job market, using artificial intelligence to figure out what skills employers are looking for and comparing those with the skills that job seekers have to offer. After analyzing millions of job openings across a wide range of industries, one conclusion jumped out: Today's employers are looking for people who know how to communicate. In every profession except two, communication skills are the most-requested qualification (and in those two professions, they ranked second).¹

What does this mean to you? It means that no matter what career path you might follow, improving your communication skills will give you a significant competitive edge in the job market. And you've come to the right place! This course is designed to help you develop the skills that will help you get ahead.

Burning Glass applies artificial intelligence to the challenges of matching employer need with employee skill sets.
