Essentials Of Sociology 10th Edition Henslin:

The Sacred Project of American Sociology Christian Smith, 2014-07-03 Counter to popular perceptions contemporary American sociology is and promotes a profoundly sacred project at heart Sociology today is in fact animated by sacred impulses driven by sacred commitments and serves a sacred project Sociology appears on the surface to be a secular scientific enterprise its founding fathers were mostly atheists Its basic operating premises are secular and naturalistic Sociologists today are disproportionately not religious compared to all Americans and often irreligious The Sacred Project of American Sociology shows counter intuitively that the secular enterprise that everyday sociology appears to be pursuing is actually not what is really going on at sociology s deepest level Christian Smith conducts a self reflexive tables turning cultural and institutional sociology of the profession of American sociology itself showing that this allegedly secular discipline ironically expresses Emile Durkheim s inescapable sacred exemplifies its own versions of Marxist false consciousness and generates a spirited reaction against Max Weber s melancholically observed disenchantment of the world American sociology does not escape the analytical net that it casts over the rest of the ordinary world Sociology itself is a part of that very human very social often very sacred and spiritual world And sociology s ironic mis recognition of its own sacred project leads to a variety of arguably self destructive and distorting tendencies This book re asserts a vision for what sociology is most important for in contrast with its current commitments and calls sociologists back to a more honest fair and healthy vision of its purpose

A Sociotheological Approach to Catholic Social Teaching Vivencio O. Ballano, 2022-10-31 This book introduces Catholic social teaching CST and its teaching on the common good to the reader and applies them in the realm of public health to critically analyze the major global issues of COVID 19 that undermine public interest It uses the sociotheological approach that combines the moral principles of CST and the holistic analysis of modern sociology and also utilizes the secondary literature as the main source of textual data Specifically it investigates the corporate moral irresponsibility and some unethical business practices of Big Pharma in the sale and distribution of its anti COVID vaccines and medicines the injustice in the inequitable global vaccine distribution the weakening of the United States Congress s legislative regulation against the pharmaceutical industry s overpricing and profiteering the inadequacy of the World Health Organization s WHO law enforcement system against corruption and the lack of social monitoring in the current public health surveillance system to safeguard the public good from corporate fraud and white collar crime This book highlights the contribution of sociology in providing the empirical foundation of CST s moral analysis and in crafting appropriate Catholic social action during the pandemic It is hoped that through this book secular scholars social scientists religious leaders moral theologians religious educators and Catholic lay leaders would be more appreciative of the sociotheological approach to understanding religion and COVID 19 This book brings into dialogue two bodies of literature documents of Catholic social teaching and modern sociology and its core thinkers and texts The author does especially well to describe how taking the sociotheological turn will

benefit the credibility and dissemination of Catholic social thought Rev Fr Thomas Massaro S J Professor of Moral Theology Jesuit School of Theology Santa Clara University Berkeley California

Sociological Theories of Health and Illness William C. Cockerham, 2020-07-09 Sociological Theories of Health and Illness reviews the evolution of theory in medical sociology, beginning with the field's origins in medicine and extending to its present-day standing as a major sociological subdiscipline. Sociological theory has an especially important role in the practice of medical sociology because its theories distinguish the subdiscipline from virtually all other scientific fields engaged in the study of health and illness. The focus is on contemporary theory because it applies to contemporary conditions; however, since theory in sociology is often grounded in historical precedents and classical foundations, this material is likewise included as it relates to medical sociology today. This book focuses on the most commonly used sociological theories in the study of health and illness, illustrating their utility in current examples of empirical research on a wide range of topics. The qualitative or quantitative research methods applicable to specific theories are also covered. Distinctions between macro and micro levels of analysis and the relevance of the agency-structure dichotomy inherent in all theories in sociology are discussed. Beginning with classical theory (Durkheim, Weber, and Marx) and the neglected founders (Gilman, Martineau, and DuBois) along with symbolic interaction (Mead), Strauss, and labeling theory (Becker), and poststructuralism and postmodernism (Foucault), coverage is extended to contemporary medical sociology. Discussion of the stress process model (Pearlin) is followed by the social construction of gender and race and intersectionality theory (Collins). Health lifestyle theory (Cockerham), life course theory (Elder), fundamental cause theory (Link and Phelan), and theories of the medical profession (Freidson), medicalization and biomedicalization (Conrad, Clarke), and social capital (Bourdieu, Putnam, and Lin).
