Negotiating a Conversation The approach this course uses recognizes that it takes new Spanish speakers years to become fluent However if a nurse learns the medical vocabulary and strategies to properly negotiate a conversation s/he can learn to work through virtually any situation in a relatively short period of time For example if a patient says something a nurse doesn't understand the nurse can ask them to repeat it or say it slower If a nurse doesn't know how to say something s/he can point to it and ask *Cómo se dice* How do you say that These and many other techniques that are taught to help a nurse work through new situations

Use of Technology The use of technology can be very helpful to get through tricky situations However if a nurse only uses technology this provides a poor patient experience and demonstrates poor bedside manner Also if only technology is used body language and gestures are missed and the meaning
