The Ethics of Business in a Global Economy P.M. Minus, 2013-03-14 Paul M Minus Overview The papers gathered in this volume were first presented for reflection and discussion at a landmark event in March 1992 The International Conference on the Ethics of Business in a Global Economy held in Columbus Ohio brought together over 300 participants from twenty two nations in six continents This was the most geographically diverse body of leaders ever assembled to consider issues of ethics in business Approximately two thirds of them were business executives the others came mainly from the fields of education and religion Knowing the context from which this book emerged will help readers understand its composition and content As can be quickly seen the fourteen authors who have contributed to it come from different areas of the world and from different fields of endeavor One finds first essays on the book's central theme by business leaders from four nations Next there are analyses of three key topics by scholars active in the fields of economics and ethics Then come statements by practitioners of four major world religions on the relevance of their respective traditions to the ethics of business Finally there are six brief case studies prepared by two business ethicists about specific ethical issues arising in international business The authors address different facets of one of the most dramatic new facts of our time the globalization of business With many corporations now operating around the world and others planning a significant expansion of markets this development is destined to accelerate in coming decades *Ethics in an Era of Globalization* M. S. Ronald Commers, 2016-12-05 This much needed volume represents all that is new in the field of global ethics It recognizes the emergence of the search to move beyond relativism and the study of ethical aspects of globalization acknowledging aspects of globalization that make ethical reasoning itself a challenging task As such the young field of global ethics is a search for new approaches and methodologies that go beyond existing ones and succeed in addressing these ethical issues of globalization This volume presents these new developments focusing specifically on how to reconceive ethics in order to come to grips with ethical and political life today It sets out an agenda for the field of global ethics addresses the critiques and illustrates the rapprochement of global ethics This is a valuable collection of essays that connect theoretical innovation with substantive issues in the public realm and hence is suitable for a wide audience across philosophy politics international relations and development studies Ethics Codes, Corporations, and the Challenge of Globalization Wesley Cragg, 2005-02-24 Globalization has altered in significant ways the tools available to regulate international commerce One result is the emergence of ethics codes codes of responsible conduct and best practice codes designed to win adherence to internationally acceptable norms of conduct on the part of corporations and other organizations interacting in the global market place This volume looks at these developments with particular focus on five topic areas respect for human rights treatment of labor bribery and corruption environmental protection and international finance and the control of money laundering What is significant about these developments is the emerging emphasis on self regulation as the primary method

for raising standards of corporate conduct The contributors examine the reasons for the emergence of ethical codes and the phenomenon of self regulation within the context of globalization and look at the role of national governments international government institutions and other international organizations in shaping and enforcing them They also study the implications of these developments for corporate governance and the changing roles of national and international institutions in the regulation of international commerce Introduction to Globalization and Business Barbara Parker,2005-05-20 Through

Capitalism Rogene Buchholz,2013-02-01 Given the recent financial meltdown and continuing economic problems the country and the world are facing Rethinking Capitalism is particularly relevant With the government having bailed out banks and other financial institutions as well as automobile companies and anger over the compensation and severance packages provided to the managers of failed institutions in light of growing inequalities and continued high unemployment in American society many are wondering if self interest driven free market capitalism is still viable While there is some support for more active government regulation of financial and other institutions there is also significant opposition to such an approach as new political movements gain strength Are there other alternatives to create a more responsible capitalism that serves the entire society Rethinking Capitalism questions the individualistic assumptions of a capitalist society and offers a new way to understand capitalism that entails a new role for business based on community and responsibility Using classical American Pragmatism as a philosophical framework for capitalism Professor Buchholz analyzes the history of capitalistic thought and proposes that we recast management as a profession akin to law and medicine oriented toward serving the public rather than just maximization of shareholder wealth Buchholz challenges the way we understand capitalism with its emphasis on the creation of economic wealth and growth to the exclusion of other important goals and champions a new approach to the

creation of a more sustainable and responsible functioning of the capitalistic system the corporate organization and its management *The Ombudsman Handbook* James T. Frederick, 1995-09-21 In *Values Nature and Culture in the American Corporation* distinguished ethicist William Frederick explores issues of fundamental importance to all who aspire to conduct their business affairs ethically He begins with an examination of the three value systems in business that are basically incompatible and therefore in constant tension The first is the need for managers to efficiently allocate resources for maximum profits The second is the natural tendency for managers in pursuit of the first goal to accumulate power for its own sake The third is the desire for people in the community to create relationships that will perpetuate these communities Frederick brings in a range of ideas and concepts from the social sciences as well as the natural sciences to illuminate his discussion In the final section of the book he explores a range of issues of current concern to managers including corporate culture and technology
