Haynor, Pierre Hellier, 2004-09-20 The 7th International Conference on Medical Imaging and Computer Assisted Intervention MICCAI 2004 was held in Saint Malo Brittany France at the Palais du Grand Large conference center September 26-29, 2004. The p

osaltohostMICCAI2004wasstronglyencouragedandsupportedbyIRISA. Rennes IRISA is a publicly funded national research laboratory with a staff of 370 including 150 full-time research scientists or teaching research scientists and 115 postgraduate students. INRIA, the CNRS, and the University of Rennes 1 are all partners in this mixed research unit, and all three organizations were helpful in supporting MICCAI. MICCAI has become a premier international conference with in-depth perspectives on the multidisciplinary fields of medical image computing, computer-assisted intervention, and medical robotics. The conference brings together clinicians, biological scientists, computer scientists, engineers, physicists, and other researchers and offers them a forum to exchange ideas in these exciting and rapidly growing fields. The impact of MICCAI increases each year, and the quality and quantity of submitted papers this year was very impressive. We received a record 516 full submissions (8 pages in length) and 101 short communications (2 pages) from 36 different countries and 5 continents (see figures below). All submissions were reviewed by up to 4 external reviewers from the Scientific Review Committee and a primary reviewer from the Program Committee. All reviews were then considered by the MICCAI 2004 Program Committee, resulting in the acceptance of 235 full papers and 33 short communications.

Cardiovascular Catheterization and

Intervention Debabrata Mukherjee, Eric Bates, Marco Roffi, David Moliterno, 2010-08-24 The field of invasive and interventional cardiology is dynamic, with frequent advances in both technique and technology. An internationally renowned team of editors and over 100 contributors have shaped this textbook to provide clinicians with a thorough guide that covers the procedural and periprocedural aspects of coronary, peripheral, and structural heart disease diagnostics and interventions. This comprehensive and highly illustrated textbook presents critical information for anyone active in the field of cardiovascular interventions, including practical suggestions on how to set up a cardiovascular catheterization laboratory, choose the right equipment, and minimize radiation exposure. A careful analysis of the general principles of percutaneous coronary interventions, the specific knowledge needed in different clinical scenarios, as well as the patient selection criteria for each invasive procedure. In-depth coverage of non-coronary interventions, including 13 chapters on peripheral vascular interventions, including carotid artery stenting, as well as newer procedures for intracranial stenosis treatment, septal defect repair, and left atrial appendage closure. An incorporation of emerging procedures in structural heart disease, such as percutaneous aortic valve replacement and mitral valve repair, that although not presently mainstream, will likely become an important domain of interventional cardiologists. Given the importance of appropriate training and credentialing for clinicians, the textbook also includes current national guidelines and policies on the performance of the various procedures. *Study*
