International Handbook on Education in Southeast Asia Lorraine Pe Symaco, Martin Hayden, 2021-12-23. This International Handbook provides a detailed account of the education systems of 11 Southeast Asian nations including Brunei Darussalam, Cambodia, Indonesia, Lao People's Democratic Republic, Malaysia, Myanmar, the Philippines, Singapore, Thailand, Timor Leste, and Vietnam. It presents a systematic sector by sector explanation of how these national education systems deliver educational services and respond to national and international issues and challenges. With 56 chapters, the International Handbook is the region's most comprehensive educational reference source. In the first of its chapters, the editors introduce the regional context and draw attention to the distinctive characteristics of each of the 11 systems. Southeast Asia, representing 8.5% of the world's population, is as dynamic as it is diverse. The International Handbook charts progress and establishes a benchmark for documenting future developments. It also provides a stepping off point for more detailed investigations of decision making processes and outcomes across the 11 national education systems.

Polling Student Voices for School Improvement Paris S. Strom, Robert D. Strom, 2023-11-01. The purpose of this book is to help secondary school principals and college faculty fulfill their key role for continuous improvement, planning of educational practices, and safety at their institution. Rapid social and technological advances have motivated the consideration of student voice in schools across the United States. By merging student voice and educator expertise, an intergenerational perspective can emerge that more accurately portrays the strengths and limitations of a school. Strom and Strom began their research on student voice by partnering with adolescents and principals from several schools to identify topics they saw as appropriate for polling to improve schools. This effort led to the development of ten polls on school stress, career exploration, time management, attention and distraction, tutoring, peer support, school cheating, frustration, cyberbullying, and Internet learning. Every poll contains 15 to 20 multiple choice items. The process model for polling includes a step by step procedure that educational leaders can use to plan and implement.

school improvement Different methods of data analysis and ways to report overall evidence based school results are presented by age gender grade and ethnicity Student polling is distinctive from other assessment strategies because the target for data gathering is a single school without comparison to other schools This narrow base to assess student voice ensures poll results are anonymous and have local relevance to guide stakeholder responses The results of polling can provide data based evidence that can be used for continuous education improvement planning An additional benefit is to separately assess students in special education gifted and talented programs and second language acquisition learners Our web site at learningpolls.org is intended to further inform educational leaders and invite their collaboration
