The minimum mapping unit is the local watershed.

At the time of this publication, all 12 collared wolves are confirmed to be alive in Colorado. This map depicts watersheds where the 12 collared wolves in Colorado have been for the last month. In order for a watershed to indicate wolf activity, at least one GPS position was recorded within the boundaries of the watershed.

Simply because a watershed indicates wolf activity, it does not mean that a wolf or wolves are present throughout the entire watershed.

For example, a wolf has not yet been located south of I-70, even though the watershed in which a wolf was detected spans both north and south of the Interstate.
