HITACHI

INTRODUCTION

This free manual enables you to operate and service your machine correctly. Please read it so that you will be prepared fully in case of emergency.

This manual should be consulted in case of doubt in your machine and please never work the machine unless you do.

This manual is of basic usage. Detailed items in this manual are notes. The very notes however are very important.

Right-hand and left-hand sides are indicated by arrows in the directory of front pages.

When product identification numbers or the relevant Hitachi symbols, descriptions, names or drawings are used in reading the sections about the machine, these letters and symbols shall mean those which appear when you order parts. If the machine is built up of two machines, also the machine numbers shall mean a unique piece of the machine.

Warning is provided as part of Hitachi's safety program for customers who specify and purchase their equipment as insurance or risk capital. This warning is contained in the relevant sections where you should take necessary precautions.

The warnings provide you the assurance that much at least in addition other details, better suited to security needs, in some circumstances, should also provide more information, often called changes in the industry, even if the product is not of security. Should the equipment be altered, or modified to change its performance beyond the original factory specifications, the warnings will become void and any legal responsibility may be denied. Using hitachi's service organization or authorized manufacturing companies are highly recommended.

Any qualified experienced operator should therefore remember to have this sheet be placed in front of the machine. However, any other qualified personnel should be allowed to inspect, service the machine.

Buying Guide 2002 Consumer Reports,2001-11 Do your homework to determine the best value with this annually updated buying guide from Consumer Reports Includes information on what's new in home entertainment vehicles appliances and home office equipment Ratings charts and index Regenerating British Columbia's Forests R. Parish,C. M. Johnson,G. Montgomery,A. Vyse,R. A. Willis,D. Winston,D.P. Lavender,2011-11-01 Reforestation is a subject vital to the economy of British Columbia which depends heavily on its forests a valuable but expendable resource This book provides silviculturalists with a broad reference to the science and technology of reforestation in the Canadian province that forms the

single most diverse forest region in North America. The work combines for the first time both experiences recorded from practical reforestation projects and the results of scientific investigations. The chapters of Regenerating British Columbia's Forests were compiled and reviewed by experts in each field of discussion. Topics include the physiological bases for seedling vigour and the interaction of reforestation with seedling physiology; the ecology of British Columbia's bioclimatic zones and the role of ecological site classification; the application of financial analyses to reforestation decisions; current technology in manual, mechanical and chemical site preparation; and in the use of fire to prepare planting sites; recent progress in tree genetics and breeding and its relevance to the production of tree propagules; nursery technology methodology in planting evaluation techniques of plantation release; and the role of insects, disease and small mammals and birds in the reforestation process. Regenerating British Columbia's Forests will assist those responsible for planning reforestation projects to reach informed decisions and will challenge them to consider primarily the biological factors basic to reforestation success rather than short term costs and production technology. Although its main audience is practising foresters and forestry students of British Columbia, the text will be of considerable interest to foresters in other parts of Canada, the United States and Europe who manage reforestation.

Introduction to Focused Ion Beams Lucille A. Giannuzzi, North Carolina State University, 2006-05-18. Introduction to Focused Ion Beams is geared towards techniques and applications. This is the only text that discusses and presents the theory directly related to applications and the only one that discusses the vast applications and techniques used in FIBs and dual platform instruments.
