- Use only those specified accessories when installing. otherwise, it may cause the unit body to fall, water leakage, current leakage and fire, etc.
- When discharging, refrigerant is required during installation, be sure to use an air vent and air breather, as refrigerant will produce toxic gas once it mixes with hot air.
- When performing wiring work, be sure to follow the electrical codes and installation instructions, and also be sure to use the power loops exclusively for the air conditioner.
- When installing or moving the units, the refrigeration system (piping) must not mix with refrigerant R22 or air, except refrigerant R410A.
