- Use only specified fuses.

In order to protect the circuit against overcurrent, a 2A (make use of AC100V or AC120V) or 1A (make use of AC220V or AC240V) is used on the primary side of the power supply. When this fuse is below out, check thoroughly the cause, repair any faulty point present, and then replace with a specified fuse. Do not try to use the fuse other than the specified ones. Otherwise, fault may be caused or danger may be invited.

(Particularly, do not use a fuse different from the specified one in current capacity and in length.) The standards if the fuses are as follows.

*European Court Procedure* Viktor Luszcz, 2020-10-29. More than just another new theoretical study, this book really is a practical and useful tool that I sincerely recommend. From the foreword by Mr. Marc van der Woude, President of the General Court of the European Union: The new Rules of Procedure of the General Court in force as of 2015, as well as the reform of the General Court and the re-establishment of a two-tier EU judiciary in September 2016, are the last bricks in the post-Lisbon legal structure governing litigation before the EU Courts. This work covers the already sizeable case law developed after the completion of these reforms and explains the changes in the Courts' practice entailed by them. Written by experienced EU Court and Commission insiders, it gives a detailed and practice-oriented overview of the whole spectrum of litigation procedure before the EU judiciary. It also presents the entire system of judicial avenues that enable litigants to enforce their rights under EU law against European institutions, Member States, or private parties. The book is thus a comprehensive reference tool for practising lawyers and helps them present their cases effectively while at the same time offering valuable guidance to national judges dealing with cases raising points of EU law. Moreover, it provides insights into the reasoning process of the EU Courts, which will be of interest to scholars in the field and is built around a structure that facilitates its use as a teaching material.
