Hkdse 2012 English Paper 3 Banswer:

Validating Technological Innovation David Coniam, Peter Falvey, 2016-04-02 This book discusses Hong Kong's use of onscreen marking OSM in public examinations. Given that Hong Kong leads the way in OSM innovation, this book has arisen from a recognised need to provide a comprehensive coherent account of the findings of various separate but linked validation studies of onscreen public examinations in Hong Kong. The authors discuss their experience of the validation process, demonstrating how high stakes innovation should be fully validated by a series of research studies in order to satisfy key stakeholders.

English Language Education and Assessment David Coniam, 2014-07-06 This volume gathers contributions in the closely linked fields of English language assessment and language education. The contributors from China and Hong Kong represent a mixture of established and new scholars. Areas covered in the language education section range across major developments in the redefining of Hong Kong's secondary and tertiary curricula as well as the huge field of China's vocational education curriculum. Regarding assessment, the contributions reflect major changes in the marking of examinations in Hong Kong whereby all examinations from 2012 onwards are marked onscreen to quality control issues in the administration of China's College English Test which is taken by over 10 million candidates every year.

Language Across the Curriculum & CLIL in English as an Additional Language (EAL) Contexts Angel M.Y. Lin, 2016-09-15 This book will be of interest to a broad readership regardless of whether they have a background in sociolinguistics, functional linguistics or genre theories. It presents an accessible meta language i.e. a language for talking about language that is workable and usable for teachers and researchers from both language and content backgrounds, thus facilitating collaboration across content and language subject panels. Chapters 1 to 3 lay the theoretical foundation of this common meta language by critically reviewing systematically presenting and integrating key theoretical resources for teachers and researchers in this field. In turn, Chapters 4 to 7 focus on issues in pedagogy and assessment and on school-based approaches to LAC and CLIL, drawing on both research studies and the experiences of front-line teachers and school administrators. Chapter 8 provides a critical and reflexive angle on the field by asking difficult questions regarding how LAC and CLIL are often situated in contexts characterized by inequality of access to the linguistic and cultural capitals where the local languages of the students are usually neglected or viewed unfavourably in relation to the L2 in mainstream society and where teachers are usually positioned as recipients of knowledge rather than makers of knowledge. In closing, Chapter 9 reviews the state of the art in the field and proposes directions for future inquiry.
