Q: What initially drew you to the field of astronomy and space exploration?

Dr. Parker: "The night sky always fascinated me as a child. I would spend hours stargazing with a small telescope. The sense of wonder and curiosity I felt then never left me. Astronomy is the science of exploration and discovery, and it offered me the opportunity to explore the unknown."

Q: Your work focuses on exoplanets. What excites you most about studying these distant worlds?

Dr. Parker: "Exoplanets are a window into the possibilities of life beyond our planet. The diversity of exoplanets is astounding, and it challenges our understanding of what's out there. It's an incredible feeling to think that somewhere, among the stars, there may be other habitable worlds waiting to be discovered."

Q: How has technology revolutionized the field of astronomy and space exploration?

Dr. Parker: "Technology has been the driving force behind our advancements in astronomy. Telescopes, satellites, and space probes have given us the ability to see and explore the cosmos like never before. We can now detect exoplanets, study distant galaxies, and even capture the first images of black holes."

Q: What message would you like to convey to the next generation of astronomers and space enthusiasts?

Dr. Parker: "I'd say, follow your curiosity. The universe is vast and full of mysteries waiting to be unraveled. Pursue your passion for understanding the cosmos. Study, explore, and never stop asking questions. Your dedication can lead to groundbreaking discoveries."
