efficient credit portfolio engineering can increase the decision making power of bankers and boost the market value of their
banks By implementing robust risk management procedures bankers can develop comprehensive views of obligors by
integrating fundamental and market data into a portfolio framework that treats all instruments similarly Banks that can
implement strategies for uncovering credit risk investments with the highest return per unit of risk can confidently build
their businesses Through chapters on fundamental analysis and credit administration authors Morton Glantz and Johnathan
Mun teach readers how to improve their credit skills and develop logical decision making processes As readers acquire new
abilities to calculate risks and evaluate portfolios they learn how credit risk strategies and policies can affect and be affected
by credit ratings and global exposure tracking systems The result is a book that facilitates the discipline of market oriented
portfolio management in the face of unending changes in the financial industry Concentrates on the practical implementation
of credit engineering strategies and tools Demonstrates how bankers can use portfolio analytics to increase their insights
