As these issues are resolved, we will have gained valuable insights into the nature of the various forms of violence. We will also have a better understanding of the various forms of violence and the various forms of violence. We will also have a better understanding of the various forms of violence and the various forms of violence. We will also have a better understanding of the various forms of violence and the various forms of violence.

These individuals appear to not have experienced the same type of experience as the people in the other studies who were asked to consider a possible, but not a sure, loss. In the latter study, the willingness to forgo future income was only after reflection about the worst case. Perhaps it is more difficult to imagine the worst case. But again, it is not difficult for individuals who have been asked about their worst case in a monetary game, to ask for a lost future income game now. There are people who appeared to be motivated by the fact that if they lost money, they would not spend it. In fact, they did spend it. The fact that they did spend it is a good sign of having a free choice. The fact that they did not spend it is a good sign of having a free choice. The fact that they did not spend it is a good sign of having a free choice. The fact that they did not spend it is a good sign of having a free choice.

Maya Civilisation

c. 2000 BC to AD 900

The Maya people still exist today and have survived numerous attempts to wipe them out over the course of their history. This unit refers mainly to the classical Maya period, which stretches from approx. 250-950 AD. During this time society became more organised around urban areas and society became more organised. Advances were made in astronomy, maths and language, as well as architecture and agriculture. Links were made with other peoples across the continent. Scholars disagree over why the classical period came to an end, although it has been hypothesised that it was caused by a widespread drought, which ended the growth of society and impoverished the population.

Maya settlements appear to not have been planned, but a general centre point was the temple. It is thought that the stepped temples were built both as a statement of grandeur and as a route to the heavens above. This is something the Maya have in common with many other civilisations across the ancient world. Rumours of human sacrifice have seeped into popular culture, but appear to be overblown. Each settlement also had wide-open plazas which served as a meeting point, as well as a ball court where games were held. Cities were generally not organised in an identical way, but had lots of common features. There does not appear to have been a central point of authority in the Maya empire, rather society was organised through a number of rulers at local level. This is perhaps the reason the Mayans endured, without a central powerbase that could be decapitated, agreements had to be made with a number of rulers, in a way this is similar to the Indian, or even European, city-states.
