Soil Hydrology, Land Use and Agriculture Manoj Shukla, 2011 Agriculture is strongly affected by changes in soil hydrology as well as changes in land use and management practices and the complex interactions between them. This book develops an understanding of these interactions on a watershed scale using soil hydrology models and addresses the consequences of land use and management changes on agriculture from a research perspective. Case studies illustrate the impact of land use and management on various soil hydrological parameters under different climates and ecosystems.

Methods of Introducing System Models into Agricultural Research Lajpat R. Ahuja, Liwang Ma, 2020-01-22 Why model?
