Millennials & Management Lee Caraher, 2016-10-14 As management ages and prepares to work longer than previous generations and Millennials join companies at steady rate companies are suffering through tension and dissonance between Millennials and Boomers and realizing that they can't just wait for management to age out to fix it Finding productive ways to work across the generation gap is essential and the organizations that do this well will have significant strategic advantages over those that don't Millennials Management The Essential Guide to Making It Work at Work addresses a very real concern of large and small businesses nationwide how to motivate collaborate with and manage the millennial generation who now make up almost 50% of the American workforce The key is to change Boomer attitudes from disbelief and derision to acceptance and respect without giving up work standards Using real world examples author Lee Caraher gives leaders data driven steps to take to co create a productive workplace for today and tomorrow

Understanding West Africa's Ebola Epidemic Ibrahim Abdullah, Ismail Rashid, 2017-10-15 From 2013 to 2015 over 11 000 people across West Africa lost their lives to the deadliest outbreak of the Ebola virus in history Crucially this epidemic marked the first time the virus was able to spread beyond rural areas to major cities overturning conventional assumptions about its epidemiology With backgrounds ranging from development to disease control the contributors to this volume some of them based in countries affected by the Ebola epidemic consider the underlying factors that shaped this unprecedented outbreak While championing the heroic efforts of local communities and aid workers in halting the spread of the disease the contributors also reveal deep structural problems in both the countries and humanitarian agencies involved which hampered the efforts to contain the epidemic Alarming they show that little has been learned from these events with health provision remaining underfunded and poorly equipped to deal with future outbreaks Such issues they argue reflect the wider challenges we face in tackling epidemic disease in an increasingly interconnected world

The Art of Screen Time Anya Kamenetz, 2018-01-30 Finally an evidence based reassuring guide to what to do about kids and screens from video games to social media Today's babies often make their debut on social media with the very first sonogram They begin interacting with

screens at around four months old But is this good news or bad news A wonderful opportunity to connect around the world Or the first step in creating a generation of addled screen zombies Many have been quick to declare this the dawn of a neurological and emotional crisis but solid science on the subject is surprisingly hard to come by In *The Art of Screen Time* Anya Kamenetz an expert on education and technology as well as a mother of two young children takes a refreshingly practical look at the subject Surveying hundreds of fellow parents on their practices and ideas and cutting through a thicket of inconclusive studies and overblown claims she hones a simple message a riff on Michael Pollan s well known food rules Enjoy Screens Not too much Mostly with others This brief but powerful dictum forms the backbone of a philosophy that will help parents moderate technology in their children s lives curb their own anxiety and create room for a happy healthy family life with and without screens

Relationship-Rich Education Peter Felten, Leo M. Lambert, 2020-11-03 A mentor advisor or even a friend Making connections in college makes all the difference What single factor makes for an excellent college education As it turns out it s pretty simple human relationships Decades of research demonstrate the transformative potential and the lasting legacies of a relationship rich college experience Critics suggest that to build connections with peers faculty staff and other mentors is expensive and only an option at elite institutions where instructors have the luxury of time with students But in this revelatory book brimming with the voices of students faculty and staff from across the country Peter Felten and Leo M Lambert argue that relationship rich environments can and should exist for all students at all types of institutions In *Relationship Rich Education* Felten and Lambert demonstrate that for relationships to be central in undergraduate education colleges and universities do not require immense resources privileged students or specially qualified faculty and staff All students learn best in an environment characterized by high expectation and high support and all faculty and staff can learn to teach and work in ways that enable relationship based education Emphasizing the centrality of the classroom experience to fostering quality relationships Felten and Lambert focus on students influence in shaping the learning environment for their peers as well as the key difference a single well timed conversation can make in a student s life They also stress that relationship rich education is particularly important for first generation college students who bring significant capacities to college but often face long standing inequities and barriers to attaining their educational aspirations Drawing on nearly 400 interviews with students faculty and staff at 29 higher education institutions across the country *Relationship Rich Education* provides readers with practical advice on how they can develop and sustain powerful relationship based learning in their own contexts Ultimately the book is an invitation and a challenge for faculty administrators and student life staff to move relationships from the periphery to the center of undergraduate education

The Routledge Handbook of the Political Economy of Science David Tyfield, Rebecca Lave, Samuel Randalls, Charles Thorpe, 2017-04-28 The political economy of research and innovation R I is one of the central issues of the early twenty first century Science and innovation are increasingly tasked with driving and reshaping a troubled global economy while also

tackling multiple overlapping global challenges such as climate change or food security global pandemics or energy security But responding to these demands is made more complicated because R I themselves are changing Today new global patterns of R I are transforming the very structures institutions and processes of science and innovation and with it their claims about desirable futures Our understanding of R I needs to change accordingly Responding to this new urgency and uncertainty this handbook presents a pioneering selection of the growing body of literature that has emerged in recent years at the intersection of science and technology studies and political economy The central task for this research has been to expose important but consequential misconceptions about the political economy of R I and to build more insightful approaches This volume therefore explores the complex interrelations between R I both in general and in specific fields and political economies across a number of key dimensions from health to environment and universities to the military The Routledge Handbook of the Political Economy of Science offers a unique collection of texts across a range of issues in this burgeoning and important field from a global selection of top scholars The handbook is essential reading for students interested in the political economy of science technology and innovation It also presents succinct and insightful summaries of the state of the art for more advanced scholars

Ethics, Medicine, and Information Technology Kenneth W. Goodman, 2016-01-14

Information technology is transforming the practices of medicine nursing and biomedical research Computers can now render diagnoses and prognoses more accurately than humans The concepts of privacy and confidentiality are evolving as data moves from paper to silicon to clouds Big data promises financial wealth as well as riches of information and benefits to science and public health Online access and mobile apps provide patients with an unprecedented connection to their health and health records This transformation is as unsettling as it is exhilarating This unique new book is essential for anyone who uses computers in health care biomedical research or public health and cares about the ethical issues that arise in their work With chapters spanning issues from professionalism and quality to mobile health and bioinformatics it establishes what will become the core curriculum in ethics and health informatics a growing field which encourages truly inter and multidisciplinary inquiry

The Horn Engaging the Gulf Aleksi Ylönen, 2023-12-28

This book discusses theoretical perspectives of analyzing the relations between the states and non state actors in the Horn of Africa and their counterparts in the Persian Gulf and the Middle East Crucially these relations are examined primarily from the perspective of the diplomatic economic and strategic agency of the African states and societal actors Here domestic political dynamics and local power play a significant role Aleksi Ylönen provides a historically informed investigation of recent relations that involve the Gulf States and Türkiye's resurgent interest in the Horn Africa The analysis focuses on the post Arab Spring period following the Iran nuclear deal and the war in Yemen Featuring case studies from Ethiopia Somalia and Eritrea which highlight engagements of the Horn state and societal actors primarily with the Gulf States and Türkiye the study provides an empirical analysis of the interactions and connections between the two regions

The Real Cost of Cheap Food Michael

Carolan,2018-02-06 This thought provoking but accessible book critically examines the dominant food regime on its own terms by seriously asking whether we can afford cheap food and by exploring what exactly cheap food affords us Detailing the numerous ways that our understanding of food has narrowed such as its price per ounce combination of nutrients yield per acre or calories the book argues for a more contextual view of food when debating its affordability The first edition published in 2011 was widely praised for its innovative approach and readability In this new edition the author brings all data and citations fully up to date Increased coverage is given to many topics including climate change aquaculture financialization BRICS countries food based social movements gender and ethnic issues critical public health and land succession There is also greater discussion about successful cases of social change throughout all chapters by including new text boxes that emphasize these more positive messages The author shows why today s global food system produces just the opposite of what it promises The food produced under this regime is in fact exceedingly expensive Many of these costs will be paid for in other ways or by future generations and cheap food today may mean expensive food tomorrow By systematically assessing these costs the book delves into issues related but not limited to international development national security healthcare industrial meat production organic farming corporate responsibility government subsidies food aid and global commodity markets It is shown that exploding the myth of cheap food requires we have at our disposal a host of practices and policies **Labor Migration in Asia Building effective institutions** OECD,Asian Development Bank

Institute,International Labour Organization,2016-02-02 This report analyses the institutions and structures that govern labor migration in Asia It considers the important role of governments and other stakeholders in both labour destination and labour sending countries
