Risk Regulation in the Internal Market Maria Weimer, 2019-03-13 This book offers a topical inquiry into the legal and political limits of EU regulation in the field of risk and new technologies surrounded by techno scientific complexity uncertainty and societal contestation It uses agricultural biotechnology as a paradigmatic example to illustrate the complex intertwinement between environmental public health economic and social concerns in risk regulation Weimer analyses the drawbacks of the EU approach to agricultural biotechnology showing that its reductionism i e the narrow understanding of GMO risks as well as the exclusion of broader societal concerns related to environmental and social sustainability has undermined both the legitimacy and effectiveness of EU regulation in this area Resistance to this approach however has also triggered legal innovations prompting us to re think EU internal market law including the way in which it manages the tensions between unity and diversity and between social and economic concerns This text offers fresh and original insights into how far the EU can go in harmonizing regulatory approaches to risk At the same time it proposes new ways of re thinking EU risk regulation to make it more responsive to different perspectives on risk and technology A unique feature of this book is that it contributes to various strains of scholarship including risk regulation internal market law public administration and studies of governance and regulation as well as connecting these themes to broader debates about the legitimacy of European integration and new ways of differentiated integration As a result it assists in re imagining the EU internal market and its regulation as a site of diversity

Banned History Lynsey Calver, 2022-08-11 Banned History is all the juicy bits of History which were excluded from your lessons at school It unashamedly probes into the darker side of some of Britain's most admired leaders as well as exploring the hateful and depraved nature of humanity across the last 5000 years Banned History answers questions which are

deliberately avoided by the school curriculum due to the negative light Britain may be portrayed such as the real reason why Britain didn't bomb Auschwitz and how the Transatlantic Slave Trade came into being Topical issues such as whether Churchill was a racist and how homophobia developed and spread across the world are explored in depth Concepts which are too horrific to ever feature in the school curriculum are investigated to reveal how many years it takes for incest to wipe out a family what the most effective method of torture is and what kind of person tastes best Written in a bright and breezy tone Banned History is full of fascinating facts such as who discovered dolphins and who fell in love with one why America got involved in the Vietnam war why Russia turned communist how Martin Luther King got his name how many people Europe killed with their colonisation of the Americas and when and why the British government legalised men hitting their wives Welcome to the sort of History you definitely didn't get taught at school Extraterrestrial Contacts: the Roswell foil, UFOs, and how they alter our understanding of the modern world Jerry Kroth, 2017-07-22 **ICIE 2018 6th International**
