

Question 5

- (a) If $y = (\cot^{-1} x)^2$, show that $(1+x^2)^2 \frac{d^2 y}{dx^2} + 2x(1+x^2) \frac{dy}{dx} = 2$ [5]
- (b) Find the maximum volume of the cylinder which can be inscribed in a sphere of radius $3\sqrt{3}$ cm. (Leave the answer in terms of π) [5]

Question 6

- (a) Evaluate: $\int \frac{\cos^{-1} x}{x^2} dx$ [5]
- (b) Find the area bounded by the curve $y = 2x - x^2$, and the line $y = x$. [5]

Question 7

- (a) Find the Karl Pearson's co-efficient of correlation between x and y for the following data: [5]

x	16	18	21	20	22	26	27	15
y	22	25	24	26	25	30	33	14

- (b) The following table shows the mean and standard deviation of the marks of Mathematics and Physics scored by the students in a school: [5]

	Mathematics	Physics
Mean	84	81
Standard Deviation	7	4

The correlation co-efficient between the given marks is 0.86. Estimate the likely marks in Physics if the marks in Mathematics are 92.

Question 8

- (a) Bag A contains three red and four white balls; bag B contains two red and three white balls. If one ball is drawn from bag A and two balls from bag B, find the probability that: [5]
- (i) One ball is red and two balls are white;
- (ii) All the three balls are of the same colour.

but huge differences in achievement still result. If we in mathematics education seek to challenge that status quo more research must be focussed not just on diversity but also on the inclusivity of practices in mathematics education. The book is written by a group of experienced collaborating researchers who share this focus. It is written for researchers, research students, teachers and in-service professionals who recognise both the challenges but also the opportunities of creating and evaluating new inclusive approaches to curriculum and pedagogy, ones that take for granted the positive values of diversity. Several chapters report new research in this direction. The authors are part of or have visited with the mathematics education staff of the Faculty of Education at Monash University in Melbourne, Australia. The chapters all focus on the ideas of development in both research and practice, recognising that the current need is for new inclusive approaches. The studies presented are set in different contexts including Australia, China, the United States and Singapore.

Combinatorial Algorithms Ljiljana Brankovic, Joe Ryan, William F. Smyth, 2018-04-19. This book constitutes the refereed post-conference proceedings of the 28th International Workshop on Combinatorial Algorithms, IWOCA 2017, held in Newcastle, NSW, Australia, in July 2017. The 30 regular papers presented in this volume, together with 5 invited talks, were carefully reviewed and selected from 55 submissions. They were organized in topical sessions named: approximation algorithms and hardness, computational complexity, computational geometry, graphs and combinatorics, graph colourings, labellings and power domination, heuristics, mixed integer programming, polynomial algorithms, privacy and string algorithms.

Statistical Inference as Severe Testing Deborah G. Mayo, 2018-09-20 Unlock today's statistical controversies and irreproducible results by viewing statistics as probing and controlling errors *Aspects of Playwork: Play and Culture Studies* Bob Hughes, Fraser Brown, 2018-10-02 The postwar years in the UK saw the development of numerous artificial playgrounds intended to compensate children for increasing urbanization and a lack of wild places to play Many of these sites employed playleaders whose job was to use play to instill social behavioral norms on children using games with rules and organized activities From the early 1970s that approach began to be replaced by playwork a nondirective way of working Playwork marked a rejection of the adult focused practice of playleadership Playworkers relied more on an ambiance that reflected their own childhood freedoms and on the growing body of knowledge regarding the importance of play This body of new literature suggested that play unadulterated by societal objectives was crucial to the successful development of all children that play was not just good for exercise and social interaction but was vital to brain growth and the child's ability to adapt to a fast changing world Since those early days playwork has mutated through a variety of guises and over the years has begun to explore the child's impact on space the relationships between child and adult what playworkers do the therapeutic aspects of play and has even taken faltering footsteps into the complexities of the quantum world *Aspects of Playwork* reflects this awesome diversity of views and interpretation moving from the historical to the almost sci fi and from ghostly traces to the hard realities of being a child and working with children in the 2000s Most of all though *Aspects of Playwork* is a commentary on the beauty and wonder of what play is and what it is to play **Human Rights in Language and STEM Education** Zehlia Babaci-Wilhite, 2016-03-22 This volume explores the challenges of teaching and learning Science Technology Engineering and Mathematics STEM subjects in local languages and local contexts in a range of countries around the world Many countries around the world including African countries have been largely excluded from the transformation that is going on in STEM pedagogy in the USA where the emphasis is on the importance of language choice and the development of English Language Learner ELL STEM subjects in many parts of the world have been taught in a global language mainly English rather than using a local language and local curriculum This creates pedagogical challenges to the teaching of STEM The contributions to this book review evidence and arguments for the teaching of STEM subjects in local languages and several chapters make this case that this should be considered a human right both in national

educational programs and in development aid Working across disciplines and domains has the potential to lead to new understanding and the removal of barriers to progress with the ultimate goal of creating solutions to persistent problems in education Cross disciplinary work in science language and literacy has shown much promise and demonstrated the importance of developing language along with disciplinary knowledge This volume provides a deep dive into this topic with articles by several scholars in the field of language in STEM Jaqueline Barber Director of the Learning Design Group at the Lawrence Hall of Science University of California Berkeley USA In an increasingly technological world STEM Education has become a priority on national agendas and in educational institutions Meaningful access to STEM education can enable or hinder young people from gaining entry into the world of work It is against this backdrop that the edited collection Human Rights and Language in STEM Education needs to be welcomed The various chapters tackle the big questions of access and many others This edited collection is required reading for all those working in STEM and for policy makers who tend to see language and STEM as binaries rather than as interdependent Zubeida Desai Professor and Dean of Education University of the Western Cape South Africa This volume by researchers from 10 countries provides a thought and action provoking multidimensional analysis of issues on the dignity of the use of STEM subjects in local education in the perspective of human rights This book is especially recommended to researchers and education policy makers in such areas as STEM Educational Theory and Praxis Human Rights Future sustainable Development Science and Technology Literacy May it inspire similar volumes in today s politically ebullient world Francisco Gomes de Matos Professor Emeritus of Linguistics human linguistic rights scholar Federal University of Pernambuco Recife Brazil
