Subject Guide to Books in Print ,1997 **Value Based Performance Measures** Nils Eikermann, 2020-08-19 Nils Eikermann describes the framework conditions for the application of value based performance measures and critically analyses selected ones The disclosure of value based performance indicators is important in order to demonstrate the successful management of a

company and to satisfy the increasing information needs of investors. However, companies adapt the developed theoretical concepts of value based performance measures to their practical needs and thus investors are no longer able to compare the performance of companies. In addition, there is a variety of different metrics from which companies can choose. The empirical study aims to reduce existing research gaps and is divided into three parts: the analysis of annual reports of selected European companies, the calculation of a standardised value based performance measure, and a value relevance study in the form of an association study.

This includes how to define the reporting entity, recognition and measurement of the elements of financial statements, fair values in financial reporting, and the costs and benefits of disclosure. The third part assesses the interest need and theories behind the accounting, reporting and regulation industry, while parts four and five look at the institutional, social and economic aspects, with issues such as accounting for environmental management and accounting regulation, and financial reporting in Islamic countries, both issues of ever increasing importance. This authoritative Companion presents a broad overview of the state of these disciplines today and will provide a comprehensive reference source for students and academics involved in accounting, regulation and reporting.
