The paintings are not about people; they are about images. They are about the negative stereotypes that African Americans still buy into. What if the Jews never talked about the holocaust?" (Cohen, 3). Michael Ray Charles explains, due to the colossal amount of hate mail he has received about his paintings. The Forever Free Post lithograph series, like most of Charles work, reveals an unnerving message to African-Americans and Caucasians alike. The resurrection of nineteenth and twentieth century iconic ad icons such as Sambo and Mammy, are more disturbing in the twenty-first century in the climate of tolerance we live in. This doesn't stop Charles from recreating timeless imagery to challenge our perception of race. Nor does it seem to affect the value of this neo-traditionalists work. Charles' paintings and lithographs can be found all over the world at contemporary art museums in New York, London, Milan, Amsterdam and more. The Forever Free Post is series containing five lithographs which are stylized as nineteenth century circus and product advertisement posters. These lithographs are on woven paper, and were created with Charles' signature painting technique of oil wash and copper, distinguishing the look of the past. His signature, a copper penny with the Abraham Lincoln up represents society's lowest value, the penny, which ironically is a different color than all other American coin currency. Charles, Michael Ray. Forever Free Post. 1995. Lithograph. Private Collection, New York. Charles, a Louisiana native, graduated from McNeese State University in 1989 where he earned a BFA in advertising and design. From there he continued his education at the University of Texas where he received an MFA and later became a teacher at that same university. Charles' formal art and marketing focus is reflected in everything he creates; he is obsessed with communications. The influences of marketing and consumption on the masses is why he started digging up and analyzing these nineteenth century images. What was the motive behind blackface and other racially driven marketing? What type of values did these messages create and what stereotypes did they perpetuate? Challenging these questions became Charles' personal dissertation. Many African Americans have criticized his work, claiming Charles is capitalizing on imagery that is shameful to the African-American Heritage. Which Charles replies, "These images are about deconstructing symbols and tracing their history, past and present. They should make everyone uncomfortable." (Heller 8) The two-dimensional lithograph above of an African-American lady liberty is a representation of the stereotypical single mom, welfare recipient. The lady liberty, with the emphasized Sambo smile depicting a watermelon, is fulfilling the American dream which is why her hair is blonde. The picture of the baby carriage is part of this false believe system propagated by many politicians over the decades. This image is alluding to the idea that African-American woman have as much children as they possibly can in order to collect more welfare and receive higher tax returns. The stamp that reads, Free as Always on the right side of the lithograph is another racial construct that African-Americans expect everything for free. This image alludes to the rationalities that African-Americans are lazy and will...

## Formal Analysis Example Paper:

Formal Concept Analysis Bernhard Ganter, Gerd Stumme, Rudolf Wille, 2005-07-11 Formal concept analysis has been developed as a field of applied mathematics based on the mathematization of concept and concept hierarchy. It thereby allows us to mathematically represent, analyze, and construct conceptual structures. The formal concept analysis approach has been proven successful in a wide range of application fields. This book constitutes a comprehensive and systematic presentation of the state of the art of formal concept analysis and its applications. The first part of the book is devoted to foundational and methodological topics. The contributions in the second part demonstrate how formal concept analysis is successfully used outside of mathematics in linguistics, text retrieval, association rule mining, data analysis, and economics. The third part presents applications in software engineering.

Formal Concept Analysis Raoul Medina, Sergei Obiedkov, 2008-02-11 Formal Concept Analysis (FCA) is a mathematical theory of concepts and conceptual hierarchies leading to methods for conceptually analyzing data and knowledge. The theory itself strongly relies on order and lattice theory, which has been studied by mathematicians over decades. FCA proved itself highly relevant in several applications from the beginning, and over the last years, the range of applications has kept growing. The main reason for this comes from the fact that our modern society has turned into an information society. After years and years of using computers, companies realized they had stored gigantic amounts of data. Then they realized that this data, just rough information for them, might become a real treasure if turned into knowledge. FCA is particularly well suited for this purpose. From relational data, FCA can extract implications, dependencies, concepts, and hierarchies of concepts and thus capture part of the knowledge hidden in the data. The ICFA conference series gathers researchers from all over the world, being the main forum to present new results in FCA and related fields. These results range from theoretical novelties to advances in FCA-related algorithmic issues as well as application domains of FCA. ICFA 2008 was in the same vein as its predecessors: high quality papers and presentations, the place of real debate and exchange of ideas. ICFA 2008 contributed to strengthening the links between theory and applications. The high quality of the presentations was the result of the remarkable work of the authors and the reviewers. We wish to thank the reviewers for all their valuable comments, which helped the authors to improve their presentations.

Formal Concept Analysis Karel Bertet, Daniel Borchmann, Peggy Cellier, Sébastien Ferré, 2017-06-02 This book constitutes the proceedings of the 14th International Conference on Formal Concept Analysis (ICFA 2017) held in Rennes, France, in June 2017. The 13 full papers presented in this volume were carefully reviewed and selected from 37 submissions. The book also contains an invited contribution and a historical paper translated from German and originally published in *Die Klassifikation und ihr Umfeld*, edited by P. O. Degens, H. J. Hermes, and O. Opitz, Indeks Verlag, Frankfurt, 1986. The field of Formal Concept Analysis (FCA) originated in the 1980s in Darmstadt as a subfield of mathematical order theory, with prior developments in other research groups. Its original motivation was to consider complete lattices as

lattices of concepts drawing motivation from philosophy and mathematics alike FCA has since then developed into a wide research area with applications much beyond its original motivation for example in logic data mining learning and psychology

**What determines green purchase behavior?** Zhongju Liao, Shufeng Xiao, Siying Long, 2024-05-31 Green purchase behavior refers to consumers purchasing green products that are environmentally friendly using fewer resources and causing lower environmental impact and risk As a growing number of people start to recognize the importance of individual responsibility for environmental protection firms are increasingly motivated to develop green products to fit the needs of this green advocacy Despite an emerging number of consumers claiming their preference towards green brands compared to traditional alternatives researchers have found that there is a huge gap between consumers purchase intention and actual behavior which has gained much attention The psychological process of green purchase behavior may be a complicated process influenced by various factors such as consumer values and norms the pros and cons marketed for green products and various other situational factors Scholars are calling for research that explores the psychological decision making process of green purchase behavior from both theoretical and practical perspectives Due to the high pricing of green products the trade off between the price and function of green products may lower consumers satisfaction Thus there is always a gap between green purchase intention and actual purchase behavior What determines consumers actual green purchase behavior Under what conditions will the consumers pay a premium price for green products What prompts consumers to choose green brands over traditional alternatives Will green consumption be a passing trend or a long term consumption habit What influences the frequency of consumers green purchasing Scholars are welcome to share their opinions and findings about green purchase behavior to help explore this research topic We are extremely interested in the determinants of green purchase behavior and the mechanism of facilitating green consumption considering different perspectives
