The Oxford Handbook of Language and Society Ofelia García, Nelson Flores (Linguist), Massimiliano Spotti, 2017 This book challenges basic concepts that have informed the study of sociolinguistics It proposes a critical poststructuralist perspective that examines the socio historical context that led to the emergence of dominant sociolinguistic concepts and develops new theoretical and methodological tools that challenge these dominant concepts Going to University Case, Jennifer, Marshall, Delia, 2018-02-09 Around the world more young people than ever before are attending university Student numbers in South Africa have doubled since democracy and for many families higher education is a route to a better future for their children But alongside the overwhelming demand for higher education questions about its purposes have intensified Deliberations about the curriculum culture and costing of public higher education abound from student activists academics parents civil society and policy makers We know from macro research that South African graduates generally have good employment prospects But little is known at a detailed level about how young people actually make use of their university experiences to craft their life courses And even less is known about what happens to those who drop out This accessible book brings together the rich life stories of 73 young people six years after they began their university studies It traces how going to university influences not only their employment options but also nurtures the agency needed to chart their own way and to engage critically with the world around them The book offers deep insights into the ways in which public higher education is both a private and public good and it provides significant conclusions pertinent to anyone who works in and cares about universities **Higher Education in the BRICS Countries** Simon Schwartzman, Rómulo Pinheiro, Pundya Pillay, 2015-03-24 In spite of the increasing attention attributed to the rise in prominence of the BRICS Brazil Russia India China and South Africa countries few studies have looked at the ways in which broader social expectations with respect to the role of higher education across the BRICS have changed or not in recent years Our point of departure is that contrary to the conventional

wisdom focusing on functionalistic perspectives higher education systems are not just designed by governments to fulfill certain functions but have a tendency for evolving in a rather unpredictable fashion as a result of the complex interplay between a number of internal and external factors In reality national higher education systems develop and change according to a complex process that encompasses the expectations of governmental agencies markets the aspirations of the population for the benefits of education the specific institutional traditions and cultures of higher education institutions and increasingly so the interests and strategies of the private firms entering and offering services in the higher education market This basically means that it is of outmost importance to move away from conceiving of universities or higher education as single monolithic actors or sector One way of doing this is by investigating a selected number of distinct but nonetheless interrelated factors or drivers which taken together help determine the nature and scope of the social compact between higher education its core actors and institutions and society at large government industry local communities professional associations
