

Freakonomics Ch 3 discussion questions. Please note down answers and bring to class.

1. How do Levitt and Dubner argue that “conventional wisdom” is established?
2. Think of a piece of conventional wisdom about Chicago. What incentives might there be to espouse this particular narrative about the city?
3. Why do Levitt and Dubner introduce the drug dealer story in this way? Is this what economists do? Explain.
4. Why doesn't Venkatesh get killed on his first visit to the projects?
5. Should JT have stayed in marketing since he already spent money getting a college degree? Explain.
6. How do officers differ from foot soldiers? How do foot soldiers differ from the rank-and-file?
7. Draw an organizational chart for the Black Disciples (i.e., an hierarchy of power).
8. What may have limited JT from expanding his business further? Why didn't he expand his territory more quickly from the 12 square miles? What do you think his marginal analysis looked like?
9. To the extent estimates allow, quantify the tradeoffs faced by a foot soldier. Then, qualify them, considering risks and moral/social concerns. What else does a foot soldier consider besides the financial tradeoff? Be detailed and specific. How does this differ for different individuals within the organization?
10. Would you consider all of the actors Venkatesh met to be rational? What about their actions? Why or why not? Do any have “predictably irrational” biases? Check out pages 258–262 of Krugman for more info.

Enough of Us Cheryl Levinson, Ellis Levinson, 2013-02 Couples without children continue to be viewed as strange and too often they're only just tolerated But Cheryl and Ellis Levinson a married couple who have lived childfree for twenty eight years don't just defend those who refrain from having children they celebrate them They also argue that society doesn't treat childfree couples fairly and that many couples with children are putting the world at risk Overpopulation poses real dangers including an increased threat of climate change accelerated animal and plant extinctions and the wholesale destruction of rainforests and other habitats The Levinsons explore the increasingly common choice to remain childfree and challenge the ethics of those who choose to procreate They consider a host of issues including liabilities facing children motivations to have children financial implications lack of parental preparation nature versus nurture and world sustainability Despite the dangers of overpopulation many people continue to have children without thinking through the consequences It's time to take a larger view and consider whether or not there are Enough of Us

The Wire Sherryl Vint, 2013-03-15 Analyzes how *The Wire* repurposed television drama for political critique Frequently described by creator David Simon as a novel for television *The Wire* redefined the police serial format by unfolding its narrative across many episodes constructing themes for each of its seasons and refusing to portray individual crimes outside of their social context While it never achieved spectacular ratings or won an Emmy during its 2002-2008 run on HBO the show was honored with several awards and has been described by critics as the best show on television In this volume author Sherryl Vint takes a close look at several episodes of *The Wire* to argue that the series challenges our understanding of the relationship between entertainment and social critique Informed by recent work on race poverty and the transformation of the American inner city through neoliberalism Vint provides a compelling analysis of *The Wire* in four chapters First she examines the season 1 episode *The Buys* as an example of the ways in which *The Wire* diverges from the police procedural format She continues by considering season 2's *All's Prologue* and season 3's *Middle Ground* to explore in more detail *The Wire*'s critique of the exclusions of the capitalist economy In the final two chapters she looks at *Final Grades* the fourth season finale to highlight the problems with institutional inertia and show both the need for and barriers to reform and uses the season 5 episode *Clarifications* to consider the failure of the media to adequately reflect the social issues depicted in *The Wire* One of the landmark series of recent television history *The Wire* is ripe for research and discussion Fans of the series and those interested in social commentary and the media will appreciate Vint's new analysis in this volume

Neuroteach Glenn Whitman, Ian Kelleher, 2016-06-20 Teachers are brain changers Thus it would seem obvious that an understanding of the

brain the organ of learning would be critical to a teacher's readiness to work with students. Unfortunately, in traditional public, public charter, private, parochial, and home schools across the country, most teachers lack an understanding of how the brain receives, filters, consolidates, and applies learning for both the short and long term. Neuroteach was therefore written to help solve the problem teachers and school leaders have in knowing how to bring the growing body of educational neuroscience research into the design of their schools' classrooms and work with each individual student. It is our hope that Neuroteach will help ensure that one day every student, regardless of zip code or school type, will learn and develop with the guidance of a teacher who knows the research behind how his or her brain works and learns. *How We Think, but not in School* Patrick J. Lewis, 2007-01-01

If story is the basic principle of mind, then what are we doing in elementary schools? In this provocative exploration of narrative, the author writes from the idea that story is integral to the generation of meaning in human experience. Indeed, story plays a significant role in the formation of identity and the development of greater empathic understanding. The text begins with a discussion of the epistemological and ontological nature of narrative in human understanding and then travels across the narrative landscape of the school setting. Through an examination of the impact of standards and accountability emphasis on curriculum, the author suggests current practice may be undermining student learning and engagement. Further, the author places oracy in temporary opposition to literacy, challenging us to rethink our assumptions about the role of literacy in learning. Without negating the importance of literacy, attention is drawn to what is lost in chasing the assumed inherent goodness of a text-based literacy and how this might hinder the growth of our children. The value of narrative in developing teaching practice and promoting significant learning is brought to the foreground of the discussion, which naturally journeys into an exploration of curriculum, raising serious questions about developmental approaches to curriculum construction. *How we think but not in school* will appeal to elementary teachers, early literacy teachers, teacher educators, and those interested in narrative. 50 Economics Classics Tom Butler-Bowdon, 2022-11-08

Economics drives the modern world and shapes our lives, but few of us feel we have time to engage with the breadth of ideas in the subject. *50 Economics Classics* is the smart person's guide to two centuries of discussion of finance, capitalism, and the global economy. From Adam Smith's *Wealth of Nations* to Thomas Piketty's bestseller *Capital in the Twenty-First Century*, here are the great reads, seminal ideas, and famous texts clarified and illuminated for all. The revised edition will include 56 new titles addressing some more up-to-date areas of the subject, such as *The Bitcoin Standard*, *The Age of Surveillance Capitalism*, and *Discrimination and Disparities*. It has a revised introduction to reflect on the current turbulence and challenges facing the global economy over the next decade, has some of the less relevant titles removed, and is something of a modern classic in its own right. *Economist* magazine: *50 Economics Classics* is a celebration of the large, imaginative canvasses of the great economists. Butler-Bowdon's choices are broad, interdisciplinary, and compellingly idiosyncratic. His chapters are not simply straight summaries of the chosen works, but thoughtful reflections on why we should care about this or that book and what its

relevance is for us today Butler Bowdon's renderings are done so well that one might never bother going back to the original Professional economists students and general readers alike will find much here to delight in and many new byways to explore Niall Kishtainy Fellow in Economic History London School of Economics *Region Focus*, 2005 [The Code Economy](#) Philip E. Auerswald, 2017-01-25 What do Stone Age axes Toll House cookies and Burning Man have in common They are all examples of code in action What is code Code is the DNA of human civilization as it has evolved from Neolithic simplicity to modern complexity It is the how of progress It is how ideas become things how ingredients become cookies It is how cities are created and how industries develop In a sweeping narrative that takes readers from the invention of the alphabet to the advent of the Blockchain Philip Auerswald argues that the advance of code is the key driver of human history Over the span of centuries each major stage in the advance of code has brought a shift in the structure of society that has challenged human beings to reinvent not only how we work but who we are We are in another of those stages now The Code Economy explains how the advance of code is once again fundamentally altering the nature of work and the human experience Auerswald provides a timely investigation of value creation in the contemporary economy and an indispensable guide to our economic future [The PerformanceStat Potential](#) Robert D. Behn, 2014-06-24 It started two decades ago with CompStat in the New York City Police Department and quickly jumped to police agencies across the U S and other nations It was adapted by Baltimore which created CitiStat the first application of this leadership strategy to an entire jurisdiction Today governments at all levels employ PerformanceStat a focused effort by public executives to exploit the power of purpose and motivation responsibility and discretion data and meetings analysis and learning feedback and follow up all to improve government's performance Here Harvard leadership and management guru Robert Behn analyzes the leadership behaviors at the core of PerformanceStat to identify how they work to produce results He examines how the leaders of a variety of public organizations employ the strategy the way the Los Angeles County Department of Public Social Services uses its DPSSTATS to promote economic independence how the City of New Orleans uses its BlightStat to eradicate blight in city neighborhoods and what the Federal Emergency Management Agency does with its FEMAStat to ensure that the lessons from each crisis response recovery and mitigation are applied in the future How best to harness the strategy's full capacity The PerformanceStat Potential explains all [Math Education for America?](#) Mark Wolfmeyer, 2013-12-04 Math Education for America analyzes math education policy through the social network of individuals and private and public organizations that influence it in the United States The effort to standardize a national mathematics curriculum for public schools in the U S culminated in 2010 when over 40 states adopted the Common Core State Standards for Mathematics Rather than looking at the text of specific policy documents this book complements existing critical reviews of the national math education curriculum by employing a unique social network analysis Breaking new ground in detailing and theorizing the politics of math education Wolfmeyer argues that the private interests of this network are closely tied to a web of interrelated

developments human capital education policy debates over traditional and reform pedagogy the assumed content knowledge deficit of math teachers and the proliferation of profit driven educational businesses By establishing the interconnectedness of these interests with the national math education curriculum he shows how the purported goals of math education reform are aligned with the prevailing political agendas of this social network rather than the national interest

Biopolitics After Neuroscience Jeffrey P. Bishop, M. Therese Lysaught, Andrew A. Michel, 2022-05-19 This book offers a provocative analysis of the neuroscience of morality Written by three leading scholars of science medicine and bioethics it critiques contemporary neuroscientific claims about individual morality and notions of good and evil Winner of a 2021 prize from the Expanded Reason Institute it connects moral philosophy to neoliberal economics and successfully challenges the idea that we can locate morality in the brain Instead of discovering the source of morality in the brain as they claim to do the popularizers of contemporary neuroscience are shown to participate in an understanding of human behavior that serves the vested interests of contemporary political economy Providing evidence that the history of claims about morality and brain function reach back 400 years the authors locate its genesis in the beginnings of modern philosophy science and economics They further map this trajectory through the economic and moral theories of Francis Bacon David Hume Jeremy Bentham John Stuart Mill and the Chicago School of Economics to uncover a pervasive colonial anthropology at play in the neuroscience of morality today The book concludes with a call for a humbler and more constrained neuroscience informed by a more robust human anthropology that embraces the nobility beauty frailties and flaws in being human
