South African Conference on Spirituality and Healthcare Annemarie Oberholzer, André de la Porte, 2018-06-11 Illness causes an existential crisis for people as it confronts them with the fragility vulnerability and finitude of the human condition Serious illness and hospitalisation can be challenging and life changing experiences especially in a context with poor resources and limited support Healthcare workers meet patients in this space of disarray Human qualities such as faith hope and compassion become crucial aspects of care Patients responses to these qualities highlight the importance of spirituality as part of holistic care not only for the patients and their families but also for the healthcare worker The 2nd Biennial South African Conference on Spirituality and Healthcare brought together leading experts from different disciplines and offered a variety of perspectives to explore the ways in which spirituality interacts with healing growth and wholeness in healthcare This volume addresses principles and practices for spirituality and healthcare spiritual assessment the role of community psychology models of spiritual care volunteers and children's spirituality in healthcare *This Week in South Africa*, 1995

Working with indigenous knowledge Fhumulani M. Mulaudzi, Rachel T. Lebeso, 2022 The aim of the book is to assist both local and international scholars in articulating the scholarly discourse on indigenous health attitudes practices and experiences The indigenous lens that was used to generate and disseminate indigenous knowledge in this book will strengthen indigenous scholarship thus making it accessible to a wider audience In addition the information shared in this book will add value for scholars and assist them with the indigenous knowledge needed to address sustainable development goals This book is timeless and topical as the discourse on the decolonisation of the curriculum is widely debated in the higher education space The discourse on the scholarship of indigenous knowledge as the tacit local knowledge that stems

from cultural practices within communities has not been well articulated in the current health science education milieu. Indigenous knowledge has remained overlooked and undermined for a very long time and the information remains untapped in local communities. The scholars who conducted the research on which this book is based unearthed a wealth of knowledge which was tacit in nature and translated it into implicit knowledge that can be documented and shared with other scholars globally. This knowledge will assist health care scholars in benefiting from knowledge practices and cultural beliefs that will assist them in health care planning, teaching, evidence-based practice and further research. **South African AIDS**
