**Rethinking South China Sea Disputes** Katherine Tseng, 2016-12-08 The proposed book draws on the on going South China Sea dispute and the multifaceted challenges wrought by the South China Sea issue that requires an inter disciplinary perspective It employs legal analytical methods to emphasize the nuances of the role and interpretation of international law and treaties by China in different periods while taking into account policy and strategic concerns which generally cast great sways in decision making The re introduction of interdisciplinary concerns straddling law and history illustrates that the historical dimension which has

long been neglected is an emerging concern that poses looming dangers that may unexpectedly radicalize the friction Contributing to debunking the mystique wrought by confrontations between a historical and a law dominated perspective these perspectives are supported by a more nuanced analytical framework featuring theoretical concerns with a tinge of practicality The South China Sea Dispute aims to unveil a nuanced evolution of the issue with a confluence of inter temporal law policy and maritime practices in the South China Sea

**Rethinking Climate Change, Conflict and Security** Jan Selby, Clemens Hoffmann, 2017-10-02 Is global climate change likely to become a significant source of violent conflict and should it therefore be seen as a national security

challenge Most Northern governments militaries think tanks and NGOs believe so as do many academic researchers on the grounds that increased temperatures changing precipitation patterns and rising sea levels will worsen existing social stresses especially within poor societies and marginal communities across Africa and Asia This book argues otherwise The first collection of its kind it brings together leading scholars of Anthropology Geography Development Studies and International Relations to provide a series of critical analyses of mainstream thinking on the climate security nexus It shows how policy discourse on climate conflict consistently misrepresents the causes of violence especially by obscuring its core political dimensions It demonstrates that quantitative research provides a flawed basis for understanding climate conflict linkages It argues that climate security discourse is in hoc with a range of questionable military authoritarian and developmental agendas And it reveals that the greening of global capitalism is already having violent consequences across the global South Climate change the book argues does indeed have serious conflict and security implications but these are quite different from how they are usually imagined This book was published as a special issue of Geopolitics Urban Agriculture for Growing City Regions Undine Giseke, Maria Gerster-Bentaya, Frank Helten, Matthias Kraume, Dieter Scherer, Guido Spars, Fouad Amraoui, Abdelaziz Adidi, Said Berdouz, Mohamed Chlaida, Majid Mansour, Mohamed Mdafai, 2015-09-07 This book demonstrates how agriculture can play a determining role in integrated climate optimised urban development Agriculture within urban growth centres today is more than an economic or social left over or a niche practice It is instead a complex system that offers multiple potentials for interaction with the urban system Urban open space and agriculture can be linked to a productive green infrastructure this forms new urban rural linkages in the urbanizing region and helps shape the city But in order to do this agriculture has to be seen as an integral part of the urban fabric and it has to be put on the local agenda Urban Agriculture for Growing City Regions takes the example of Casablanca one of the fastest growing cities in North Africa to investigate this approach The creation of synergies between the urban and rural in an emerging megacity is demonstrated through pilot projects design solutions and multifunctional modules These synergies assure greater resource efficiency particularly regarding the use and reuse of water and they strengthen regional food security and the social integration of multiple spheres A transdisciplinary research approach brings together different scientific disciplines and local actors into a process of integrated knowledge production The book will have a long lasting legacy and is essential reading for researchers planners practitioners and policy makers who are working on urban development and urban agricultural strategies **Smart Specialization in Croatia** Arabela Aprahamian, Paulo Guilherme Correa, 2015-06-25 The report examines recent trends in Croatia s in trade productivity innovation performance and policy governance framework to help identify priorities for the development of the country s Smart Specialization Strategy which is an ex ante conditionality for access to the EU s Structural and Investment Funds over the 2014 20 programming period
