Geography November 2013 Memorandum:

American State-Building in Afghanistan and Its Regional Consequences Neamat Nojumi, 2016-03-03 The book calls for rethinking U S policy toward promoting Afghanistan as a regional economic hub in Southwest and Central Asia as it fits within the broader national security interest of the regional states It argues for defining Afghanistan within the U S national security interests in Southwest and Central Asia including Iran and offers critical strategic tools for Washington to support political openness and reforms that can balance China and Russia as well as more effectively manage Iran s regional behavior It links the U S policy approach in Southwest and Central Asia as the missing leg of Washington s East Asia policy The book defines the strategic interests of each of Afghanistan s neighboring states and key regional actors to explain why a rethinking of the U S role in Afghanistan can assist the emergence of a new regional order in Southwest and Central Asia which in turn can embolden a free market economy and a growing political openness superior to authoritarianism and Islamist militancy

Reexamining Economic and Political Reforms in Russia, 1985-2000 Vladimir Gel'man, Dmitry Travin, Otar Marganiya, 2014-06-25 Reexamining Economic and Political Reforms in Russia 1985 2000 Generations Ideas and Changes analyzes the impact of generational changes and ideational changes on major political and economic reforms conducted in Russia during the late twentieth century This book examines how the policy agenda was shaped by the ideas of the generations representatives for the sixties and seventies Representatives of the generation of sixties conducted reforms from 1985 to 1991 and invested major efforts in political liberalization but did not pay enough attention to economic reforms On the other hand the reformers from the generation of seventies who were in charge of policy making from 1991 to 1998 were genuinely oriented toward market building but rather insensitive to the democratization of the political regime This book explores how these differences in ideational agendas produced inconsistent and controversial outcomes from both stages of reforms

The Divided States of America Donald F. Kettl, 2022-03-15 As James Madison led America s effort to write its Constitution he made two great inventions the separation of powers and federalism The first is more famous but the second was most essential because without federalism there could have been no United States of America Federalism has always been about setting the balance of power between the federal government and the states and that s revolved around deciding just how much inequality the country was

prepared to accept in exchange for making piece among often warring states Through the course of its history the country has moved through a series of phases some of which put more power into the hands of the federal government and some rested more power in the states Sometimes this rebalancing led to armed conflict The Civil War of course almost split the nation permanently apart And sometimes it led to political battles By the end of the 1960s however the country seemed to have settled into a quiet agreement that inequality was a prime national concern that the federal government had the responsibility for addressing it through its own policies and that the states would serve as administrative agents of that policy But as that agreement seemed set federalism drifted from national debate just as the states began using their administrative role to push in very different directions The result has been a rising tide of inequality with the great invention that helped create the nation increasingly driving it apart *Landscape, Memory, and Post-Violence in Cambodia* James A.

Tyner,2016-11-16 Between 1975 and 1979 the Khmer Rouge regime in Cambodia enacted a program of organized mass violence that resulted in the deaths of approximately one quarter of the country s population Over two million people died from torture execution disease and famine From the commodification of the killing fields of Choeung Ek to the hundreds of unmarked mass graves scattered across the country violence continues to shape the Cambodian landscape *Landscape Memory and Post Violence in Cambodia* explores the on going memorialization of violence As part of a broader engagement with war violence and critical heritage studies it explores how a legacy of organized mass violence becomes part of a cultural heritage and in the process how this heritage is produced Existing literature has addressed explicitly the impact of war and armed conflict on cultural heritage through the destruction of heritage sites This book inverts this concern by exploring what happens when sites of heritage violence are under threat It argues that the selective memorialization of Cambodia s violent heritage negates the everyday lived experiences of millions of Cambodians and diminishes the efforts to bring about social justice and reconciliation In doing so it develops a grounded conceptual understanding of post violence in conflict zones internationally

The Coming of Neo-Feudalism Joel Kotkin,2020-05-12 Following a remarkable epoch of greater dispersion of wealth and opportunity we are inexorably returning towards a more feudal era marked by greater concentration of wealth and property reduced upward mobility demographic stagnation and increased dogmatism If the last seventy years saw a massive expansion of the middle class not only in America but in much of the developed world today that class is declining and a new more hierarchical society is emerging The new class structure resembles that of Medieval times At the apex of the new order are two classes a reborn clerical elite the clerisy which dominates the upper part of the professional ranks universities media and culture and a new aristocracy led by tech oligarchs with unprecedented wealth and growing control of information These two classes correspond to the old French First and Second Estates Below these two classes lies what was once called the Third Estate This includes the yeomanry which is made up largely of small businesspeople minor property owners skilled workers and private sector oriented professionals Ascendant for much of modern history this class is

in decline while those below them the new Serfs grow in numbers a vast expanding property less population The trends are mounting but we can still reverse them if people understand what is actually occurring and have the capability to oppose them

Stuck at Home Yasmin Y. Ortega, 2025-05-27 The Philippines is among the most successful migrant sending nations in the world both lauded and critiqued for exporting its own citizens to a global labor market Yasmin Y Ortega brings readers beyond this popular image to explore questions often overlooked What happens when workers who were encouraged to emigrate are suddenly unable to leave *Stuck at Home* examines how the Philippine state and its aspiring migrants negotiated the meaning of immobility amid the COVID 19 pandemic In this pioneering book Ortega studies the narratives that emerged around two groups of Filipino workers nurses banned from leaving the country and cruise workers who returned home after COVID 19 shut down the travel industry Ortega emphasizes the high stakes in telling the right story of immobility to a nation built around emigration one that provides a compelling rationale for who deserves to move and who can be forced to stay A gripping account of political interests frustrated dreams and an unprecedented crisis *Stuck at Home* reveals how migration governance is not only about regulating people's movement but also defining the meaning and implications of remaining in place

Citizens Stephen M. Engel, 2016-05-24 A sweeping historical and political account of how our present day policy debates around citizenship and equality came to be The landmark Supreme Court decision in June 2015 legalizing the right to same sex marriage marked a major victory in gay and lesbian rights in the United States Once subject to a patchwork of laws granting legal status to same sex couples in some states and not others gay and lesbian Americans now enjoy full legal status for their marriages wherever they travel or reside in the country For many the Supreme Court's ruling means that gay and lesbian citizens are one step closer to full equality with the rest of America In *Fragmented Citizens* Stephen M Engel contends that the present moment in gay and lesbian rights in America is indeed one of considerable advancement and change but that there is still much to be done in shaping American institutions to recognize gays and lesbians as full citizens With impressive scope and fascinating examples Engel traces the relationship between gay and lesbian individuals and the government from the late nineteenth century through the present Engel shows that gays and lesbians are more accurately described as fragmented citizens Despite the marriage ruling Engel argues that LGBT Americans still do not have full legal protections against workplace housing family and other kinds of discrimination There remains a continuing struggle of the state to control the sexuality of gay and lesbian citizens they continue to be fragmented citizens Engel argues that understanding the development of the idea of gay and lesbian individuals as less than whole citizens can help us make sense of the government's continued resistance to full equality despite massive changes in public opinion Furthermore he argues that it was the state's ability to identify and control gay and lesbian citizens that allowed it to develop strong administrative capacities to manage all of its citizens in matters of immigration labor relations and even national security The struggle for gay and lesbian rights then affected not only the lives of those seeking equality but also the very nature of American governance itself *Fragmented Citizens* is a sweeping historical and political account of how our present day policy debates around citizenship and equality came to be *Southeastern Geographer* David M. China's Foreign Relations and the Survival of Autocracies Julia Bader, 2014-10-30 The Chinese government has frequently been criticized for propping up anti democratic governments This book investigates the rise of China as an emerging authoritarian power By comparing China's bilateral relations to three Asian developing countries Burma Cambodia and Mongolia it examines how China targets specific groups of actors in autocracies versus non autocracies It illustrates how the Chinese non interference policy translates into support for incumbent leaders in autocratic countries and how the Chinese government has thereby profited from exploiting secretive decision making in autocracies to realize its own external interests such as achieving access to natural resources In a statistical analysis of the patterns of Chinese external cooperation and their impact on the survival of autocratic leaders the book finds some evidence that China is more likely to target autocracies with economic cooperation However only some forms of bilateral interaction are found to increase the prospect of survival for autocratic leaders This important contribution to the understanding of both external factors of authoritarian endurance and China's foreign relations a field of study still lacking systematic investigation will be of great interest to students and researchers in Development Studies Asian Studies International Relations and International Political Economy

The Report: Oman 2014 Oxford Business Group, 2014-01-15 The sultanate's economy continues to enjoy the benefits of petroleum wealth which has provided budget surpluses in most years and served as a backbone for growth However planning is well under way for an era in which oil will not be the main economic driver with the twin goals of diversification and creating an

increased number of private sector jobs at the top of the government's current agenda. Indeed in recent years the non OPEC oil exporter's economy has been undergoing a steady transformation reorienting from oil toward a more diverse set of service and industry based economic activities. So far progress has been promising. In 2011 oil and gas accounted for 38.8% of GDP. With the continuation of higher than expected energy prices in 2012 the government has increased economic investments accordingly. These investments which include infrastructure, social programmes and small business development are aimed toward better preparing the country for its post fossil fuel future.

Invasion of Laos, 1971 Robert D. Sander, 2014-02-26

In 1971 while U.S. ground forces were prohibited from crossing the Laotian border, a South Vietnamese Army corps with U.S. air support launched the largest airmobile operation in the history of warfare, Lam Son 719. The objective was to sever the North Vietnamese Army's main logistical artery, the Ho Chi Minh Trail, at its hub Tchepone in Laos, an operation that, according to General Creighton Abrams, could have been the decisive battle of the war, hastening the withdrawal of U.S. forces and ensuring the survival of South Vietnam. The outcome: defeat of the South Vietnamese Army and heavy losses of U.S. helicopters and aircrews, but a successful preemptive strike that met President Nixon's near-term political objectives.

Author Robert Sander, a helicopter pilot in Lam Son 719, explores why an operation of such importance failed. Drawing on archives and interviews and firsthand testimony and reports, Sander chronicles not only the planning and execution of the operation but also the maneuvers of the bastions of political and military power during the ten-year effort to end Communist infiltration of South Vietnam, leading up to Lam Son 719. The result is a picture from disparate perspectives: the Kennedy, Johnson, and Nixon administrations; the South Vietnamese government led by President Nguyen Van Thieu; and senior U.S. military commanders and army aviators. Sander's conclusion is at once powerful and persuasively clear: Lam Son 719 was doomed in both the planning and execution, a casualty of domestic and international politics, flawed assumptions, incompetent execution, and the resolve of the North Vietnamese Army. A powerful work of military and political history, this book offers eloquent testimony that failure like success cannot be measured in absolute terms.
