November 2019 Monthly Current Affairs with MCQs for Competitive Exams Disha Experts, 2019-10-21 General Studies Paper 1 & 2 IAS Prelims 9 Year-wise Solved Papers (2019 - 11) Disha Experts, 2019-09-02 **Chinese Migrants and Africa's Development** Doctor Ben Lampert, Doctor May Tan-Mullins, Daphne Chang, Giles Mohan, 2014-06-12 China's recent stepping up of relations with Africa is one of the most significant developments on the African continent for decades For some it promises an end to Africa's dependent aid relationships as the Chinese bring expertise technology and a stronger business focus But for others it is no more than a new form of imperialism This book is the first to systematically study the motivations relationships and impact of this migration It focuses not just on the Chinese migrants but also on the perceptions of and linkages to their African hosts By studying this everyday interaction we get a much richer picture of whether this is South South cooperation as political leaders would have us believe or a more complex relationship that can both compromise

and encourage African development **Business, Peacebuilding and Sustainable Development** Jason Miklian, Rina Alluri, John Elias Katsos, 2019-05-29 The intersection of business peace and sustainable development is becoming an increasingly powerful space and is already beginning to show the capability to drive major global change This book deciphers how different forms of corporate engagement in the pursuit of peace and development have different impacts and outcomes It looks specifically at how the private sector can better deliver peace contributions in fragile violent and conflict settings and then at the deeper consequences of this agenda upon businesses governments international institutions and not least the local communities that are presumed to be the beneficiaries of such actions It is the first book to compile the state of the field in one place and is therefore an essential guide for students researchers policy makers and practitioners on the role of business in peace Without cross disciplinary engagement it is hard to identify where the cutting edge truly lies and how to take the topic forward in a more systematic manner This edited book brings together thought leaders in the field and pulls disparate strands together from business ethics management international relations peace and conflict studies in order to better understand how businesses can contribute to peacebuilding and sustainable development Before businesses take a deeper role in the most complicated and risky elements of sustainable development we need to be able to better explain what works why it works and what effective business efforts for peace and development mean for the multilateral institutional frameworks This book does just that **Peacekeeping and the African Union** Jude Cocodia, 2017-09-27 This book offers a detailed examination of the effectiveness of the peacekeeping operations of the African Union Despite its growing reputation in peacekeeping and its status as the oldest continental peacekeeper the performance of the African Union AU has hitherto not been assessed This book fills that gap and analyses six case studies Burundi Comoros Somalia Mali Darfur and the Central African Republic From a methodological perspective it takes a problem solving approach and utilises process tracing in its analysis with its standard for success resting on achieving negative peace the cessation of violence and provision of security Theoretically this study offers a comprehensive list of factors drawn from peace literature and field experience which influence the outcome of peacekeeping Beyond the major issues such as funding international collaboration and mandate this work also examines the impact of largely ignored factors such as force integrity and territory size The book modifies the claim of peace literature on what matters for success and advocates the indispensability of domestic elite cooperation local initiative and international political will It recognises the necessity of factors such as lead state and force integrity for certain peace operations In bringing these factors together this study expands the peacekeeping debate on what matters for stability in conflict areas This book will be of much interest to students of peacekeeping African politics war and conflict studies and International Relations in general **Territorial Cohesion in Rural Europe** Andrew K. Copus, Philomena de Lima, 2014-08-13 This book reflects on how the economies social characteristics ways of life and global relationships of rural areas of Europe have changed in recent years This reveals a need to refresh the concepts we use to

understand measure and describe rural communities and their development potential This book argues that Europe has outgrown many of the stereotypes usually associated with it with substantial implications for European Rural Policy Rural structural change and its evolving geography are portrayed through regional typologies and the concept of the New Rural Economy Demographic change migration business networks and agricultural restructuring are each explored in greater detail Implications for equality and social exclusion and recent developments in the field of governance are also considered Despite being a subject of active debate interventions in the fields of rural and regional development have failed to adapt to changing realities and have become increasingly polarized This book argues that rural regional policy needs to evolve in order to address the current complex reality partially reformulating territorial or place based approaches and the New Rural Paradigm following a set of principles termed Rural Cohesion Policy

The Oxford Handbook of Africa and Economics

Nigeria a key oil producing state The ecological and economic impacts of oil and gas development particularly in developing nations are crucial topics for ecologists natural resource professionals and pollution researchers to understand This book takes an integrative approach to these problems through the lens of one of the key oil producing nations linking natural and human systems through the valuation of ecosystem services Provides background information on Nigerian aquatic environments its local history of oil exploration and a review of the physical chemistry of crude oil Reviews global and national perspectives on the oil and gas industry from a physical ecological to a socio political and economic ecological perspective Demonstrates real life situations of the interactions and impacts of Nigerian petroleum production on the environment and local populations through case studies Neoliberalizing Spaces in the Philippines Arnisson Andre Ortega, 2016-09-09 Amidst the recent global financial crisis and housing busts in various countries the Philippines booming housing industry has been heralded as Southeast Asia s hottest real estate hub and the saving grace of a supposedly resilient Philippine economy This growth has been fueled by demand from balikbayan returnee Overseas Filipinos and has facilitated the rise of gated suburban communities in Manila s sprawling peri urban fringe But as the Filipino dreams of successful balikbayans are built inside these new gated residential developments the lives of marginalized populations living in these spaces have been upended and thrown into turmoil as they face threats of expulsion Based on almost four years of research this book examines the tumultuous geographies of neoliberalization that link suburbanization transnational mobilities and accumulation by dispossession Through an accounting of real estate and new suburban landscapes it tells of a Filipino transnationalism that engenders a market based and privatized suburban political economy that reworks socio spatial relations and class dynamics In presenting the literal and discursive transformations of spaces in Manila s peri urban fringe the book details life inside new gated suburban communities and discusses the everyday geographies of privileged new property owners mainly comprised of balikbayan families and exposes the contradictions of gated suburban life from resistance to Home Owner Association rules to alienating feelings of loss It also reveals the darker side of the property boom by mapping the volatile spaces of the Philippines surplus populations comprised of the landless farmers informal settler residents and indigenous peoples To make way for gated communities and other profitable developments in the peri urban region marginalized residents are systematically dispossessed and displaced while concomitantly offered relocation to isolated socialized housing projects the last frontier for real estate accumulation These compelling accounts illustrate how the territorial embeddedness of neoliberalization in the Philippines entails the consolidation of capital by political economic elites and privatization of residential space for an idealized transnational property clientele More than ever as the Philippines is being reshaped by diaspora and accumulation by dispossession the contemporary moment is a critical time to reflect on what it truly means to be a nation
