*The Ukraine War & the Eurasian World Order* Glenn Diesen,2024-02-15 Five hundred years of Western hegemony has ended while the global majority s aspiration for a world order based on multipolarity and sovereign equality is rising This incisive book addresses the demise of liberal hegemony though pointing out that a multipolar Westphalian world order has not yet taken shape leaving the world in a period of interregnum A legal vacuum has emerged in which the conflicting sides are competing to define the future order NATO expansionism was an important component of liberal hegemony as it was intended to cement the collective hegemony of the

West as the foundation for a liberal democratic peace Instead it dismantled the pan European security architecture and set Europe on the path to war without the possibility of a course correction Ukraine as a divided country in a divided Europe has been a crucial pawn in the great power competition between NATO and Russia for the past three decades The war in Ukraine is a symptom of the collapsing world order The war revealed the dysfunction of liberal hegemony in terms of both power and legitimacy and it sparked a proxy war between the West and Russia instead of ensuring peace the source of its legitimacy The proxy war unprecedented sanctions and efforts to isolate Russia in the wider world contributed to the demise of liberal hegemony as opposed to its revival Much of the world responded to the war by intensifying their transition to a Eurasian world order that rejects hegemony and liberal universalism The economic architecture is being reorganised as the world diversifies away from excessive reliance on Western technologies industries transportation corridors banks payment systems insurance systems and currencies Universalism based on Western values is replaced by civilisational distinctiveness sovereign inequality is swapped with sovereign equality socialising inferiors is replaced by negotiations and the rules based international order is discarded in favour of international law A Westphalian world order is reasserting itself although with Eurasian characteristics The West's defeat of Russia would restore the unipolar world order while a Russian victory would cement a multipolar one The international system is now at its most dangerous as the prospect of compromise is absent meaning the winner will take all Both NATO under US direction and Russia are therefore prepared to take great risks and escalate making nuclear war increasingly likely

Barbosa, 2015-05-08 The Amazon region is the focus of intense conflict between conservationists concerned with deforestation and advocates of agro industrial development This book focuses on the contributions of environmental organizations to the preservation of Brazilian Amazonia It reveals how environmental organizations such as Greenpeace Friends of the Earth WWF and others have fought fiercely to stop deforestation in the region It documents how the history of frontier expansion and environmental struggle in the region is

linked to Brazil's position in an evolving capitalist world economy. It is shown how Brazil's effort to become a developed country has led successive Brazilian governments to devise development projects for Amazonia. The author analyses how globalization has led to the expansion of international commodity chains in the region particularly for mineral ores, soybeans and beef. He shows how environmental organizations have politicized these commodity chains as weapons of conservation through boycotting certain products while other pro-development groups within Brazil claim that such organizations threaten Brazil's sovereignty over its own resources.
