**Distance, Rating Systems and Enterprise Finance** Franz Flögel, 2018-07-27 In response to the credit crunch during the global financial crisis of 2007 2008 many have called for the re establishment of regional banks in the UK and elsewhere In this context Germany's regional banking system with its more than 1 400 small and regional savings banks and cooperative banks is viewed as a role model in the financing of small and medium sized enterprises SMEs However in line with the death of distance debate the universal application of ICT based scoring and rating systems potentially obviates the necessity for proximity to reduce information asymmetries between banks and SMEs calling into question the key advantage of regional banks Utilising novel ethnographic findings from full time participant observation and interviews this book presents intimate insights into regional savings banks and compares their SME lending practices with large nationwide operating commercial banks in Germany The ethnographic insights are

contextualised by concise description of the three pillar German banking system covering bank regulation structural and geographical developments and enterprise finance Furthermore the book advances an original theoretical approach that combines classical banking theories with insights from social studies of finance on the ontological foundation of new realism Ethnographic findings reveal varying distances of credit granting depending on the rating results i.e. large banks allocate considerable credit granting authority to local staff and therefore challenge the proximity advantages of regional banks Nevertheless by presenting case studies of lending to SMEs the book demonstrates the ability of regional banks to capitalise on proximity when screening and monitoring financially distressed SMEs and explains why the suggestion that ICT can substitute for proximity in SME lending has to be rejected

*Local Government and the COVID-19 Pandemic* Carlos Nunes Silva, 2022-05-03 The book provides a global perspective of local government response towards the COVID 19 pandemic through the analysis of a sample of countries in all continents It examines the responses of local government as well as the responses local government developed in articulation with other tiers of government and with civil society organizations and explores the social economic and policy impacts of the pandemic The book offers an innovative contribution on the role of local government during the pandemic and discusses lessons for the future The COVID 19 pandemic had a global impact on public health in the well being of citizens in the economy on civic life in the provision of public services and in the governance of cities and other human settlements although in an uneven form across countries cities and local communities Cities and local governments have been acting decisively to apply the policy measures defined at national level to the specific local conditions COVID 19 has exposed the inadequacy of the crisis response infrastructures and policies at both national and local levels in these countries as well as in many others across the world But it also exposed much broader and deeper weaknesses that result from how societies are organized namely the insecure life a substantial proportion of citizens have as a result of economic and social policies followed in previous decades which accentuated the impacts of the lockdown measures on employment income housing among a myriad of other social dimensions Besides the analysis of how governments and local government responded to the public health issues raised by the spread of the virus the book deals also with the diversity of responses local governments have adopted and implemented in the countries regions cities and metropolitan areas The analysis of these policy responses indicates that previously unthinkable policies can surprisingly be implemented at both national and local levels
