Waste of a Nation Assa Doron, Robin Jeffrey, 2018-03-26 Assa Doron and Robin Jeffrey argue that in India the removal and reuse of waste lays waste to human lives People at the bottom are injured and stigmatized as they work with sewage toxic chemicals and rotting garbage If India is to emerge as a model for the world its policies will have to reach beyond the environment to encompass empathy 'Natural' Disasters and Everyday Lives Suddhabrata Deb Roy, 2024-10-08 Recognising that these issues are addressed guite differently in the Global North Suddhabrata Deb Roy connects flooding in northeastern India to the context of the broader politics surrounding climate change and climate justice in the Global South making this book important and powerful reading for countering today s climate emergency The Rights of Women Erika Bachiochi, 2021-07-15 Erika Bachiochi offers an original look at the development of feminism in the United States advancing a vision of rights that rests upon our responsibilities to others In The Rights of Women Erika Bachiochi explores the development of feminist thought in the United States Inspired by the writings of Mary Wollstonecraft Bachiochi presents the intellectual history of a lost vision of women's rights seamlessly weaving philosophical insight biographical portraits and constitutional law to showcase the once predominant view that our rights properly rest upon our concrete responsibilities to God self family and community Bachiochi proposes a philosophical and legal framework for rights that builds on the communitarian tradition of feminist thought as seen in the work of Elizabeth Fox Genovese and Jean Bethke Elshtain Drawing on the insight of prominent figures such as Sarah Grimk Frances Willard Florence Kelley Betty Friedan Pauli Murray Ruth Bader Ginsburg and Mary Ann Glendon this book is unique in its treatment of the moral roots of women s rights in America and its critique of the movement s current trajectory The Rights of Women provides a synthesis of ancient wisdom and modern political insight that locates the family s vital work at the very center of personal and political self government Bachiochi demonstrates that when rights are properly understood as a civil and political apparatus born of the natural duties we owe to one another they make more visible our personal responsibilities and more viable our common life together This

smart and sophisticated application of Wollstonecraft's thought will serve as a guide for how we might better value the culturally essential work of the home and thereby promote authentic personal and political freedom The Rights of Women will interest students and scholars of political theory gender and women s studies constitutional law and all readers interested in women s rights Postwar Laura McEnaney, 2018-09-07 When World War II ended Americans celebrated a military victory abroad but the meaning of peace at home was yet to be defined From roughly 1943 onward building a postwar society became the new national project and every interest group involved in the war effort from business leaders to working class renters held different visions for the war s aftermath In Postwar Laura McEnaney plumbs the depths of this period to explore exactly what peace meant to a broad swath of civilians including apartment dwellers single women and housewives newly freed Japanese American internees African American migrants and returning veterans In her fine grained social history of postwar Chicago McEnaney puts ordinary working class people at the center of her investigation What she finds is a working class war liberalism a conviction that the wartime state had taken things from people and that the postwar era was about reclaiming those things with the state s help McEnaney examines vernacular understandings of the state exploring how people perceived and experienced government in their lives For Chicago's working class residents the state was not clearly delineated The local offices of federal agencies along with organizations such as the Travelers Aid Society and other neighborhood welfare groups all became what she calls the state in the neighborhood an extension of government to serve an urban working class recovering from war Just as they had made war the urban working class had to make peace and their requests for help large and small constituted early dialogues about the role of the state during peacetime Postwar examines peace as its own complex historical process a passage from conflict to postconflict that contained human struggles and policy dilemmas that would shape later decades as fatefully as had the war New Labor in New York Ruth Milkman, Edward Ott, 2014-03-07 New York City boasts a higher rate of unionization than any other major U S city roughly double the national average but the city's unions have suffered steady and relentless decline especially in the private sector With higher levels of income inequality than any other large city in the nation New York today is home to a large and growing precariat workers with little or no employment security who are often excluded from the basic legal protections that unions struggled for and won in the twentieth century Community based organizations and worker centers have developed the most promising approach to organizing the new precariat and to addressing the crisis facing the labor movement Home to some of the nation's very first worker centers New York City today has the single largest concentration of these organizations in the United States yet until now no one has documented their efforts New Labor in New York includes thirteen fine grained case studies of recent campaigns by worker centers and unions each of which is based on original research and participant observation Some of the campaigns documented here involve taxi drivers street vendors and domestic workers as well as middle strata freelancers all of whom are excluded from basic employment laws Other cases focus on supermarket retail and

restaurant workers who are nominally covered by such laws but who often experience wage theft and other legal violations still other campaigns are not restricted to a single occupation or industry This book offers a richly detailed portrait of the new labor movement in New York City as well as several recent efforts to expand that movement from the local to the national scale Energy and Water Development Appropriations for 2015: 2015 Congressional budget justification: Federal Energy Regulatory Commission; Defense Nuclear Facilities Safety Board; U.S. Nuclear Regulatory Commission; Appalachian Regional Commission; Delta Regional Authority; Denali Commission United States. of Venezuela His most lasting venture as an Artic fur trader led to the founding of the Hudson's Bay Company which operates today 350 years later as North America's oldest corporation Sourced from Radisson's journals which are the best first hand accounts of 17th century Canada Bush Runner tells the extraordinary true story of this protean 17th century figure a man more trading partner than colonizer a peddler of goods and not worldview and with it offers a fresh perspective on the world A Brighter Future Richard Holt, Daphne Greenwood, 2014-12-18 As the United States continues its slow climb out of the Great Recession it is important to focus on new directions to improve the standard of living in America This book explores what is behind a faltering standard of living in the United States since the early 1980s and what can be done to restore it The book is uniquely valuable in going beyond mainstream thinking about how to restore prosperity Economics has traditionally equated economic growth increases in per capita income with improvements in quality of life and the standard of living This book questions that assumption The different chapters in the book show the standard of living as being more than income to include many non market aspects such as access to public goods roads clean air and water schools parks and museums intangible aspects of quality of life such as equity and a sense of community and broadly based economic opportunities. This means that improving the standard of living is a multi dimensional challenge rather than one of solely increasing aggregate demand productivity or GDP This book embodies a pluralistic approach and draws on the expertise of a wide array of thinkers The intended audience is for various courses offered in economics sociology political science public policy programs and in environmental and ecological studies A World More Concrete N. D. B. Connolly, 2014-08-25 Connolly argues that Americans immigrants and even indigenous people between the 1890s and the 1960s made tremendous investments in racial apartheid largely in an effort to govern growing cities and to unleash the value of land as real estate Through a focus on South Florida the book illustrates how entrepreneurs used land and debates over property rights to negotiate the workings of Jim Crow segregation Sustainable Peace in Northeast Asia Yong-Shik Lee, 2023-09-05 Sustainable Peace in Northeast Asia examines the causes of lasting and complex tensions in the region from underlying political historical military and economic perspectives discusses their historical development and political economic implications for the world and explores possible solutions to build lasting peace The book is unique in that it approaches the topic from the historical perspective of each constituent country in the region Major global powers such as the United States and Russia have also closely engaged in the political and economic affairs of this region through a network of alliances diplomacy trade and investment The book also discusses the influence of these external powers over the crisis their political and economic objectives in the region their strategies and the dynamics that their engagement has created Both South Korea and North Korea have sought reunification of the Korean peninsula which will have a substantial impact on the region The book examines its justification feasibility and effects for the region The book discusses the role of Mongolia in the context of the power dynamics in Northeast Asia A relatively small country in terms of its population Mongolia has rarely been

examined in this context Sustainable Peace in Northeast Asia makes a fresh assessment of its potential role Fighting the *Great War at Sea* Norman Friedman, 2014-10-15 While the overriding image of the First World War is of the bloody stalemate on the Western Front the overall shape of the war arose out of its maritime character It was essentially a struggle about access to worldwide resources most clearly seen in Germany's desperate attempts to counter the American industrial threat which ultimately drew the United States into the war This radical new book concentrates on the way in which each side tried to use or deny the sea to the other and in so doing describes rapid wartime changes not only in ship and weapons technology but also in the way naval warfare was envisaged and fought Melding strategic technical and tactical aspects Friedman approaches the First World War from a fresh perspective and demonstrates how its perceived lessons dominated the way navies prepared for the Second World War Toxic Communities Dorceta Taylor, 2014-06-20 Uncovers the systemic problems that expose poor communities to environmental hazards From St Louis to New Orleans from Baltimore to Oklahoma City there are poor and minority neighborhoods so beset by pollution that just living in them can be hazardous to your health Due to entrenched segregation zoning ordinances that privilege wealthier communities or because businesses have found the paths of least resistance there are many hazardous waste and toxic facilities in these communities leading residents to experience health and wellness problems on top of the race and class discrimination most already experience Taking stock of the recent environmental justice scholarship Toxic Communities examines the connections among residential segregation zoning and exposure to environmental hazards Renowned environmental sociologist Dorceta Taylor focuses on the locations of hazardous facilities in low income and minority communities and shows how they have been dumped on contaminated and exposed Drawing on an array of historical and contemporary case studies from across the country Taylor explores controversies over racially motivated decisions in zoning laws eminent domain government regulation or lack thereof and urban renewal She provides a comprehensive overview of the debate over whether or not there is a link between environmental transgressions and discrimination drawing a clear picture of the state of the environmental justice field today and where it is going In doing so she introduces new concepts and theories for understanding environmental racism that will be essential for environmental justice scholars A fascinating landmark study Toxic Communities greatly contributes to the study of race the environment and space in the contemporary United States Reversing Urban Decline Mark S. Rosentraub, 2014-07-29 Detroit s bankruptcy is the most severe example of the financial implications of the movement of wealth to the suburbs When residents and businesses leave central cities have a disproportionate share of most regions lower income households At the same time many central cities collect less revenue as states cut financial support So we are left with the question can central cities change patterns of economic activity In Reversing Urban Decline Why and How Sports Entertainment and Culture Turn Cities into Major League Winners Second Edition author Mark Rosentraub details how central cities facing increasing levels of economic segregation can use new urban areas anchored by sports venues to

enhance their financial position See What s New in the Second Edition Increased focus on urban revitalization urban theory and urban planning Two additional case studies Denver and Fort Wayne to give the book a broader appeal and more material to make the book a good fit for urban planning urban studies and public policy classes New data based on additional research and follow up on several of the original cases Rosentraub anchors the book more closely in the center of the debate on urban revitalization the financial issues facing central cities and the ways in which public leaders can respond to the economic segregation developing between central cities and their suburban areas That disparity is reducing the taxes that central cities receive reducing their ability to provide the services residents need Rather than just provide us with a brief escape from our problems sports and entertainment with the right leadership can create opportunities for our cities to reinvent and reinvigorate themselves Placing sports as one of the central elements to revitalize urban centers this book uses several case studies to develop a set of rules to help cities plan for the effective use and returns from their investments in sports entertainment and cultural centers
