Kyrgyzstan - Regime Security and Foreign Policy Kemel Toktomushev,2016-10-04 Kyrgyzstan is an interesting example of a relatively weak state which for its brief period of independence has already ousted two presidents experienced two revolutions survived two interethnic conflicts and yet remained intact This book explores this apparent paradox and argues that the schism between domestic and international dimensions of state and regime security is key to understanding the nature of Kyrgyz politics The book shows how the foreign policy links to the Manas Air Base used by the US military and essential for supplying their forces in Afghanistan the economic arrangements necessary for sustaining the base both inside and outside Kyrgyzstan and the myriad of different actors involved in all this combined to overshadow points of friction to ensure stable continuance of the status quo Overall the book shows how broad geopolitical forces and complex local factors together have a huge impact on the formation of Kyrgyz foreign policy Practising Cultural Geographies Ravi S.

International Relations Norms Charlotte Epstein,2017-05-08 This volume uses the concept of norms to initiate a long overdue conversation between the constructivist and postcolonial scholarships on how to appraise the ordering processes of international politics Drawing together insights from a broad range of scholars it evaluates what it means to theorise international politics from a postcolonial perspective understood not as a unified body of thought or a new ism for IR but as a situated perspective offering ex centred post Eurocentric sites for practices of situated critique Through in depth engagements with the norms constructivist scholarship the contributors expose the theoretical epistemological and practical erasures that have been implicitly effected by the uncritical adoption of norms as the dominant lens for analysing the ideational dynamics of international politics They show how these are often the very erasures that sustained the workings of colonisation in the first place whose uneven power relations are thereby further sustained by the study of international politics The volume makes the case for shifting from a static analysis of norms to a dynamic and deeply historical understanding of the drawing of the initial line between the normal and the abnormal that served to exclude from focus the strange and the unfamiliar that were necessarily brought into play in the encounters between the West and the rest of the

world A timely intervention it will be of great interest to students and scholars of international relations international relations theory and postcolonial scholarship *City of Forests, City of Farms* Lindsay K. Campbell, 2017-10-15 City of Forests City of Farms is a history of recent urban forestry and agriculture policy and programs in New York City Centered on the 2007 initiative PlaNYC this account tracks the development of policies that increased sustainability efforts in the city and dedicated more than 400 million dollars to trees via the MillionTreesNYC campaign Lindsay K Campbell uses PlaNYC to consider how and why nature is constructed in New York City Campbell regards sustainability planning as a process that unfolds through the strategic interplay of actors the deployment of different narrative frames and the mobilizing and manipulation of the physical environment which affects nonhuman animals and plants as well as the city's residents Campbell zeroes in on a core omission in PlaNYC's original conception and funding Despite NYC having a long tradition of community gardening particularly since the fiscal crisis of the 1970s the plan contained no mention of community gardens or urban farms Campbell charts the change of course that resulted from burgeoning public interest in urban agriculture and local food systems She shows how civic groups and elected officials crafted a series of visions and plans for local food systems that informed the 2011 update to PlaNYC City of Forests City of Farms is a valuable tool that allows us to understand and disentangle the political decisions popular narratives and physical practices that shape city greening in New York City and elsewhere *The Middle and Upper Paleolithic Archeology of the Levant and Beyond* Yoshihiro Nishiaki, Takeru Akazawa, 2017-12-06 This volume is a compilation of results from sessions of the Second International Conference on the Replacement of Neanderthals by Modern Humans which took place between November 30 and December 6 2014 in Hokkaido Japan Similar to the first conference held in 2012 in Tokyo the 2014 conference RNMH2014 aimed to compile the results of the latest multidisciplinary approaches investigating the issues surrounding the replacement of Neanderthals by modern humans The results of the sessions supplemented by off site contributions center on the archeology of the Middle and Upper Paleolithic of the Levant and beyond The first part of this volume presents recent findings from the Levant while the second part focuses on the neighboring regions namely the Caucasus the Zagros and South Asia The 13 chapters in this volume highlight the distinct nature of the cultural occurrences during the Middle and Upper Paleolithic periods of the Levant displaying a continuous development as well as a combination of lithic traditions that may have originated in different regions This syncretism which is an unusual occurrence in the regions discussed in this volume reinforces the importance of the Levant as a region for interpreting the RNMH phenomenon in West Asia *Exploring Greenland* Ronald E.
