

Small business owners are often faced with the challenge of finding the right mix of products and services to offer their customers. This is especially true for those who are just starting out or looking to expand their offerings. One way to address this challenge is by using a combination of data-driven insights and creative thinking. For example, a small business owner might use data to identify the most popular products and services in their market, and then use creative thinking to develop new and innovative offerings that meet the needs of their customers. By combining data and creativity, small business owners can create a unique and competitive offering that sets them apart from their competitors.

Textbooks and Educational Media: Perspectives from Subject Education Péter Bagoly-Simó, Zuzana Sikorová, 2021-08-05 This book brings together empirical research and conceptual work on textbooks and education media from 13 countries and 17 disciplines. Along with textbook production usage and development, it also explores the interconnectedness of educational policy and teaching and learning materials. Further, the book offers insights into regional and local discourses, e.g. specific theories of Portuguese and Spanish-speaking countries as well as Nordic countries, contrasting their theories with international literature practices and solutions with regard to teaching selected subjects at the pre-primary, primary, secondary and tertiary level. This book also discusses the specific combinations of subjects, e.g. Physics, Biology, Geography, Swedish, English, and their subject-specific education, e.g. Physics Education or Didactics. Lastly, it examines the work of a number of early career researchers, giving them a voice and bringing in fresh ideas currently being developed in various countries around the globe. This proceedings volume will appeal to publishers, subject educators in primary, secondary and tertiary education, and academic researchers from the fields of textbooks, educational media, and subject-specific education. Its international authorship and explicit focus on subject-specific particularities of educational media provide a unique and comprehensive overview.

Brazilian Geography Rubén C. Lois González, Marco Antonio Mitidiero Junior, 2022-11-28 This book presents the history and theoretical contributions of Brazilian geography since the late twentieth century and shows how this sphere of knowledge has been organically integrated with social and territorial issues and with social movements. The relationship between the subjects and objects of research in Brazilian geography has been centred on the understanding and transformation of realities marked by injustice and inequality. Against this backdrop, the

geography of the country has developed by integrating relating to and forming part of those realities as it headed out into the streets Brazilian geography continues to hold theoretical debate in high regard as a result of the influence of critical theory This book thus covers the theoretical approaches in Brazilian geography its different lines of research and above all its character as manifested in culture and society
