The Geography of Injustice Barak Kushner, 2024-03-15 In *The Geography of Injustice* Barak Kushner argues that the war crimes tribunals in East Asia formed and cemented national divides that persist into the present day In 1946 the Allies convened the Tokyo Trial to prosecute Japanese wartime atrocities and Japan's empire At its conclusion one of the judges voiced dissent claiming that the justice found at Tokyo was only the sham employment of a legal process for the satisfaction of a thirst for revenge War crimes tribunals Kushner shows allow for the history of the defeated to be heard In contemporary East Asia a fierce battle between memory and history has consolidated political camps across this debate The Tokyo Trial courtroom as well as the thousands of other war crimes tribunals opened in about fifty venues across Asia were legal stages where prosecution and defense curated facts and evidence to craft their story about World War Two These narratives and counter narratives form the basis of postwar memory concerning Japan's imperial aims across the region The archival record and the interpretation of court testimony together shape a competing set of histories for public consumption *The Geography of Injustice* offers compelling evidence that despite the passage of seven decades since the end of the war East Asia is more divided than united by history **Manhood Acts** Michael Schwalbe, 2015-11-17 In *Manhood Acts* Michael Schwalbe offers a new perspective on the social construction of manhood and its relationship to male domination Schwalbe argues that study of masculinity has lost touch with its feminist roots and has been seduced by the politically safe notion of multiple masculinities

Manhood Acts delineates the practices males use to construct women and men as unequal categories Schwalbe reclaims the radical feminist insights that gender is a field of domination not a field of play and that manhood is fundamentally about exerting or resisting control Manhood Acts arrives at the conclusion that abolishing gender as a system of oppression will require more than transgressive self presentation It will be necessary to end the exploitive economic relationships that necessitate manhood itself

Deterritorializing/Reterritorializing Nancy Ares, Edward Buendía, Robert Helfenbein, 2017-05-10 This volume features scholars who use a critical geography framework to analyze how constructions of social space shape education reform In particular they situate their work in present day neoliberal policies that are pushing responsibility for economic and social welfare as well as education policy and practice out of federal and into more local entities States cities and school boards are being given more responsibility and power in

determining curriculum content and standards accompanied by increasing privatization of public education through the rise of charter schools and for profit organizations incursion into managing schools Given these pressures critical geography s unique approach to spatial constructions of schools is crucially important Reterritorialization and deterritorialization or the varying flows of people and capital across space and time are highlighted to understand spatial forces operating on such things as schools communities people and culture Authors from multiple fields of study contribute to this book s examination of how social political and historical dimensions of spatial forces especially racial ethnic and other markers of difference shape are shaped by processes and outcomes of school reform

Unequal Learning Xin Xiang, 2025 Inequality has been soaring across the globe in the past decades And the reproduction of inequality begins early in the life cycle in homes and schools In Unequal Learning Xin Xiang analyzes the different kinds of learning that goes on in four drastically different Chinese schools a rural school in a mountainous area a public school in an impoverished region of an emerging city a low cost private school serving rural migrants and a prestigious metropolitan public school that attracts the children of elite professionals and government officials As she shows the different learning opportunities available in these four communities contribute to the widening gulf between the rising metropolitan middle class and China's working classes Within classrooms children in urban elite schools experience pedagogies drastically different from those in less privileged communities despite the common preoccupation with preparing for exams Outside classrooms urban elite children learn to lead collaborate and compete through a variety of organized activities while rural children acquire competency in farm and household work Though these particular schools are located in China Xiang demonstrates how these four Chinese

schools and communities reflect global trends as much as local peculiarities. Ultimately addressing these pervasive and deep rooted educational inequalities requires moving beyond the paradigms of closing achievement gaps and reducing learning poverty. Xiang calls for a thorough rethinking of whose knowledge and contribution counts and what good schools look like in China and beyond. Powerfully argued and deeply researched, this will be essential reading not just for scholars of China but anyone interested in how education systems both reproduce and exacerbate inequality. **Journal of American Indian Education**, 2019

A World More Concrete N.D.B. Connolly, 2014-08-25 Many people characterize urban renewal projects and the power of eminent domain as two of the most widely despised and often racist tools for reshaping American cities in the postwar period. In *A World More Concrete*, N. D. B. Connolly uses the history of South Florida to unearth an older and far more complex story. Connolly captures nearly eighty years of political and land transactions to reveal how real estate and redevelopment created and preserved metropolitan growth and racial peace under white supremacy. Using a materialist approach, he offers a long view of capitalism and the color line, following much of the money that made land taking and Jim Crow segregation profitable and preferred approaches to governing cities throughout the twentieth century. *A World More Concrete* argues that black and white landlords, entrepreneurs, and even liberal community leaders used tenements and repeated land dispossession to take advantage of the poor and generate remarkable wealth. Through a political culture built on real estate, South Florida's landlords and homeowners advanced property rights and white property rights, especially at the expense of more inclusive visions of equality. For black people and many of their white allies, uses of eminent domain helped to harden class and color lines. Yet for many reformers, confiscating certain kinds of real estate through eminent domain also promised to help improve housing conditions, to undermine the neighborhood influence of powerful slumlords, and to open new opportunities for suburban life for black Floridians. Concerned more with winners and losers than with heroes and villains, *A World More Concrete* offers a sober assessment of money and power in Jim Crow America. It shows how negotiations between powerful real estate interests on both sides of the color line gave racial segregation a remarkable capacity to evolve, revealing property owners' power to reshape American cities in ways that can still be seen and felt today.

The Russian State and Russian Energy Companies, 1992-2018 Ingerid M. Opdahl, 2020-06-09 The Russian State and Russian Energy Companies analyses the development of relations between the state and five major energy companies and how this shaped Russia's foreign policy in the post-Soviet region. The book argues that the development of Russia's political economy mattered for foreign policy over the quarter of a century from 1992 to 2018. Energy companies' roles in institutional development enabled them to influence foreign policy formation, and they became available as tools to implement foreign policy. The extent to which it happened for each company varied with their accessibility to the Russian state. Institutional development increased state capacity in a way that strengthened Russia's political regime. The book shows how the combined power of several companies in the gas, oil, electricity, and nuclear energy industry was a key feature of

Russian foreign policy both in bilateral relationships and in support of Russia's regional position. In this way, Russia's energy resources were converted to regional influence. The book contributes to our understanding of Russia's political economy and its influence on foreign policy and of the formation of policy towards post-Soviet states.
