Urban Warfare Raquel Rolnik, 2019-03-26 In *Urban Warfare* Rolnik charts how the financialisation of housing has become a global crisis as models of home ownership originating in the US and UK are being exported around the world These developments were largely organised by those who benefit the most construction companies and banks supported by government facilitated schemes such as the right to buy subsidies and micro financing Using examples ranging from Kazakhstan Indonesia Chile Israel Haiti the UK and especially Brazil Rolnik shows how our homes and neighbourhoods have effectively become the last subprime frontiers of capitalism This neoliberal colonialism is experienced on the scale of the city but also within our everyday lives Yet since the financial crisis and wider urban politics that have left millions homeless forced from their homes because of urban development politics and mega events such as the Rio World Cup in 2013 These narratives are weaved together with theoretical reflections and empirical evidence to explain the crisis in depth In response Rolnik restates the political need for activism and resistance Examining in detail the June Days protests in Rio 2013 14 she shows that housing remains an essential and global struggle

Introduction to Teaching Gene E. Hall,Linda F. Quinn,Donna M. Gollnick,2015-12-09 *Introduction to Teaching Making a Difference in Student Learning Second Edition* is the ideal text for aspiring teachers Acclaimed authors Gene Hall Linda Quinn and Donna Gollnick thoroughly prepare teacher education candidates to make a difference as teachers presenting first hand stories and evidence based practices while offering a student centered approach to learning The authors target one of the biggest challenges facing many of today s schools making sure that all students are learning and help teachers make student learning the primary focus in all that they do From true to life challenges that teachers will face high stakes testing student learning assessments low teacher retention Common Core Standards to the inspiration and joy they will discover throughout their teaching careers this text paints a realistic picture of the real life of a teacher *The Meritocracy Trap*

Daniel Markovits,2020-09-08 A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy It is an axiom of American life that advantage should be earned through ability and effort Even as the country divides itself at every turn the meritocratic ideal that social and economic rewards should follow achievement rather than breeding reigns supreme Both Democrats and Republicans insistently repeat meritocratic notions Meritocracy cuts to the heart of who we are It sustains the American dream But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy s successes This is the radical argument that Daniel Markovits prosecutes with rare force Markovits is well placed to expose the sham of meritocracy Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within Markovits also knows that if we understand that meritocratic inequality produces near universal harm we can cure it When The Meritocracy Trap reveals the inner workings of the meritocratic machine it also illuminates the first steps outward towards a new world that might once again afford dignity and prosperity to the American people *Refractions of the National, the Popular and the Global in African Cities* Simon Bekker,Slyvia Croese,2021-02-26 Case studies of metropolitan cities in nine African countries from Egypt in the north to three in West and Central Africa two in East Africa and three in Southern Africa make up the empirical foundation of this publication The interrelated themes addressed in these chapters the national influence on urban development the popular dynamics that shape urban development and the global currents on urban development make up its framework All authors and editors are African as is the publisher The only exception is Gran Therborn whose recent book Cities of Power served as motivation for this volume Accordingly the issue common to all case studies is the often conflictual powers that are exercised by national global and popular forces in the development of these African cities Rather than locating the case studies in an exclusively African historical context the focus is on the trajectories of the postcolonial city with the important exception of Addis Ababa with a non colonial history that has granted it a special place in African consciousness These trajectories enable comparisons with those of postcolonial cities on other continents This in turn highlights the fact that Africa today the least urbanised continent on an increasingly urbanised globe is in the thick of processes of large scale urban transformation illustrated in diverse ways by the case studies that make up the foundation of this publication Short Description Muslim Fashion Reina Lewis,2015-10-15 In the shops of London s Oxford Street girls wear patterned scarves over their hair as they cluster around makeup counters Alongside them hip twenty somethings style their head wraps in high

black topknots to match their black boot cut trousers Participating in the world of popular mainstream fashion often thought to be the domain of the West these young Muslim women are part of an emergent cross faith transnational youth subculture of modest fashion In treating hijab and other forms of modest clothing as fashion Reina Lewis counters the overuse of images of veiled women as evidence in the prevalent suggestion that Muslims and Islam are incompatible with Western modernity Muslim Fashion contextualizes modest wardrobe styling within Islamic and global consumer cultures interviewing key players including designers bloggers shoppers store clerks and shop owners Focusing on Britain North America and Turkey Lewis provides insights into the ways young Muslim women use multiple fashion systems to negotiate religion identity and ethnicity

Geographies of Displacement/s Kendra Strauss, 2023-05-29 This book assembles cutting edge contemporary research and thinking on multiple forms and meanings of displacements and their geographies patterns of shifting dislocation or putting out of place substitutions of one idea for another or the unconscious transfer of intense feelings or emotions activities occurring outside their normal context and replacements of one thing by another The COVID 19 pandemic declared by the World Health Organization in 2020 produced new displacements and intensified existing patterns of displacement and dispossession At the same time socionatural displacements floods fires droughts hurricanes sea level rise species loss and dislocation were the backdrop to the displaced and deferred hopes of the 2021 United Nations Climate Change Conference The chapters in this volume contend with how we as geographers conceptualize and theorize displacements the range of sites spaces processes affects scales and actors we study with to understand them and what is at stake politically in how we research displacements It is also a pandemic archive of academic labor in which we find traces of displacements within and beyond the academic discipline of geography Geographies of Displacement s will be of particular interest to students scholars and researchers of Geography including those interested in human geography socio natural displacements and the politics of migration and displacement The chapters in this book were originally published as a special issue of Annals of the American Association of Geographers

Unique Urbanity? Tara Brabazon, 2014-11-21 This book investigates small cities cities and towns that are not well known or internationally branded but are facing structural economic and social issues after the Global Financial Crisis They need to invent develop and manage new reasons for their existence The strengths and opportunities are often underplayed when compared to larger cities These small cities do not have the profile of New York London Tokyo or Cairo or second tier cities like San Francisco Manchester Osaka or Alexandria This book traces the current state of the creative industries literature after the GFC but with a specific focus The specific and worsening conditions in third tier cities are logged The social and economic challenges within these regions are great particularly with regard to health and health services education employment social mobility and physical activity This is not a study that merely diagnoses problems but raises strategies for third tier cities to create both a profile and growth The current research field is synthesized to reveal how cities are defined constituted developed and in many cases suffering

decline There is an imperative to build relationships with other urban environments The book enters these under discussed locations and reveal the scarred layering of injustice signified by depopulation dis investment economic decline and a reduction in public services for health transportation and education while also developing specific and innovative models for improvement The vista summoned in Unique Urbanity is international with strong attention to trans local strategies that offer wide relevance currency and opportunities for policy makers While third tier cities are often hidden marginalized invisible or demeaned Unique Urbanity shows that innovation imagination and creativity can emerge in small places

Spatializing Marcuse Margath A. Walker,2022-07-25 This fresh appraisal of philosopher Herbert Marcuse s work foregrounds the geographical aspects of one of the leading social and political theorists of the 20th century Margath A Walker considers how Marcusean philosophies might challenge the way we think about space and politics and create new sensibilities Applying them to contemporary geopolitics digital infrastructure and issues like resistance and immigration the book shows how social change has been stifled and how Marcuse s philosophies could provide the tools to overturn the status quo She demonstrates Marcuse s relevance to individuals and society and finds this important theorist of opposition can point the way to resisting oppressive forces within contemporary capitalism

Wealth, Poverty and Politics Thomas Sowell,2016-09-06 In *Wealth Poverty and Politics* Thomas Sowell one of the foremost conservative public intellectuals in this country argues that political and ideological struggles have led to dangerous confusion about income inequality in America Pundits and politically motivated economists trumpet ambiguous statistics and sensational theories while ignoring the true determinant of income inequality the production of wealth We cannot properly understand inequality if we focus exclusively on the distribution of wealth and ignore wealth production factors such as geography demography and culture Sowell contends that liberals have a particular interest in misreading the data and chastises them for using income inequality as an argument for the welfare state Refuting Thomas Piketty Paul Krugman and others on the left Sowell draws on accurate empirical data to show that the inequality is not nearly as extreme or sensational as we have been led to believe Transcending partisanship through a careful examination of data *Wealth Poverty and Politics* reveals the truth about the most explosive political issue of our time

Biographical Register of the Officers George Cullum,George Washington Cullum,2009-10-27

Working in Class Allison L. Hurst,Sandi Kawecka Nenga,2016-01-18 More students today are financing college through debt but the burdens of debt are

not equally shared The least privileged students are those most encumbered and the least able to repay All of this has implications for those who work in academia especially those who are themselves from less advantaged backgrounds Warnock argues that it is difficult to reconcile the goals of facilitating upward mobility for students from similar backgrounds while being aware that the goals of many colleges and universities stand in contrast to the recruitment and support of these students This combined with the fact that campuses are increasingly reliant on adjunct labor makes it difficult for the contemporary tenure track or tenured working class academic to reconcile his or her position in the academy Our Social World: Condensed Jeanne H. Ballantine, Keith A. Roberts, Kathleen Odell Korgen, 2019-07-09 Our Social World Condensed by Jeanne H Ballantine Keith A Roberts and Kathleen Odell Korgen inspires you to develop your sociological imaginations to see the world and personal events from a new perspective and to confront sociological issues on a day to day basis The award winning author team organizes the text around the Social World model a conceptual framework that demonstrates the relationships among individuals the micro level organizations institutions and subcultures the meso level and societies and global structures the macro level The use of the Social World Model across chapters represented in a visual diagram in the chapter openers helps you to develop the practice of using three levels of analysis and to view sociology as an integrated whole rather than a set of discrete subjects The Condensed version is adapted from Our Social World Introduction to Sociology The Sixth Edition of the Condensed version is made approximately 30% shorter than the full edition by removing selected boxes editing the main narrative and combining four chapters into two Family Education and Politics Economics

Rare Earth Frontiers Julie M. Klinger, 2018-01-15 Rare Earth Frontiers is a work of human geography that serves to demystify the powerful elements that make possible the miniaturization of electronics green energy and medical technologies and essential telecommunications and defense systems Julie Michelle Klinger draws attention to the fact that the rare earths we rely on most are as common as copper or lead and this means the implications of their extraction are global Klinger excavates the rich historical origins and ongoing ramifications of the quest to mine rare earths in ever more impossible places Klinger writes about the devastating damage to lives and the environment caused by the exploitation of rare earths She demonstrates in human terms how scarcity myths have been conscripted into diverse geopolitical campaigns that use rare earth mining as a pretext to capture spaces that have historically fallen beyond the grasp of centralized power These include legally and logistically forbidding locations in the Amazon Greenland and Afghanistan and on the Moon Drawing on ethnographic archival and interview data gathered in local languages and offering possible solutions to the problems it documents this book examines the production of the rare earth frontier as a place a concept and a zone of contestation sacrifice and transformation Index Medicus , 2003 Vols for 1963 include as pt 2 of the Jan issue Medical subject headings

The Coming of Neo-Feudalism Joel Kotkin, 2023-01-10 Following a remarkable epoch of greater dispersion of wealth and opportunity we are inexorably returning towards a more feudal era marked by greater concentration of wealth and property

reduced upward mobility demographic stagnation and increased dogmatism If the last seventy years saw a massive expansion of the middle class not only in America but in much of the developed world today that class is declining and a new more hierarchical society is emerging The new class structure resembles that of Medieval times At the apex of the new order are two classes a reborn clerical elite the clerisy which dominates the upper part of the professional ranks universities media and culture and a new aristocracy led by tech oligarchs with unprecedented wealth and growing control of information These two classes correspond to the old French First and Second Estates Below these two classes lies what was once called the Third Estate This includes the yeomanry which is made up largely of small businesspeople minor property owners skilled workers and private sector oriented professionals Ascendant for much of modern history this class is in decline while those below them the new Serfs grow in numbers a vast expanding property less population The trends are mounting but we can still reverse them if people understand what is actually occurring and have the capability to oppose them **GIScience**

Teaching and Learning Perspectives Shivanand Balram,James Boxall,2019-01-31 This volume uniquely links educational theories and the practice of GIScience in higher education contexts to guide classroom practice present effective practical implementations from peers and provide resources and strategies for effective teaching methods The book offers a comprehensive exploration of GIScience education including current trends and future educational needs in GIScience and will act as a resource to prepare learners for a world that demands more intensive investment in present day education and technological literacy Additionally the indirect benefit of merging the fragmented literature on GIScience literacy will provide a basis to examine common techniques and enable a new wave of research more rooted in learning theories In ten chapters the book is designed to attract an audience from geographic information systems science geomatics spatial information science cartography information technology and educational technology as focus disciplines
