Handbook of Geography Education Sarah Witham Bednarz, Jerry T. Mitchell, 2025-01-27 This handbook presents a broad and comprehensive overview of research and practices in geography education at primary and secondary levels from birth to about age 18. It summarizes the current state of knowledge in this sub-discipline of geography. Including authors representative of many geography education traditions, the book pays equal attention to learning and teaching and to respect student voices and includes rich in case studies evidence based research and specific examples. It also emphasizes ways that geography education can contribute to global concerns about social justice, diversity, equity and inclusion as well as ways it can help to prepare the next generation of informed, critical and reflective members of societies. The book is divided into five sections: Purposes of geography education, Why is it taught, Perspectives on geography education, What is taught, Practices of geography education, How is it organized and taught, Preparation of geography educators, How are geography educators prepared, Possibilities for geography education, What is the future of geography education. By providing broad perspectives and lively and accessible writing, this handbook is a useful tool for novice geography educators, teacher educators, educational policy makers, support staff such as librarians and media resource specialists, curriculum developers and assessment experts in many world regions.
