The Politics of Sustainability in the Arctic Ulrik Pram Gad, Jeppe Strandsbjerg, 2018-10-04 The Politics of Sustainability in the Arctic argues that sustainability is a political concept because it defines and shapes competing visions of the future In current Arctic affairs prominent stakeholders agree that development needs to be sustainable but there is no agreement over what it is that needs to be sustained In original conservationist discourse the environment was the sole referent object of sustainability however as sustainability discourses have expanded the concept has been linked to an increasing number of referent objects such as society economy culture and identity This book sets out a theoretical framework for understanding and analysing sustainability as a political concept and provides a comprehensive empirical investigation of Arctic sustainability discourses Presenting a range of case studies from Greenland Norway Canada Russia Iceland and Alaska the chapters in this volume analyse the concept of sustainability and how actors are employing and contesting this concept in specific regions within the Arctic In doing so the book demonstrates how sustainability is being given new meanings in the postcolonial Arctic and what the political implications are for postcoloniality nature and development more broadly Beyond those interested in the Arctic this book will also be of great value to students and scholars of sustainability sustainable development and identity and environmental politics

The European Union and the Black Sea Sinem Akgul Acikmese, Dimitrios Triantaphyllou, 2017-10-02 The idea for this book is derived from the scantiness of academic references

on the European Union's policies towards the Black Sea relative to this region's officially stated significance for the EU. Even though the EU plays a vital role in Black Sea political agendas, the EU's cooperation with the region is not extensively covered by academic discussions and literature. This is mostly due to the fact that the EU's focus on foreign affairs is mainly associated with the Balkans as part of the current and potential expansion and the Middle East as a direct consequence of the upheaval of the Arab Spring. The Black Sea region is crucially important for the EU because of the opportunities and challenges that the region presents both politically and socio-economically. Contributions to this book mostly focus on specific issues of EU Black Sea cooperation from conflict to the environment to democracy and how these particular relationships are perceived within the region as well as through the lenses of stakeholders such as Russia, Turkey and the USA. Overall, the collection focuses on projecting a more efficient role and a holistic strategy for the EU in its approach towards the Black Sea region, testifying to the need for a strong EU presence. For this reason, the Black Sea area remains the neighbourhood too close to yet still far from the European Union. This book was originally published as a special issue of the *Journal of Balkan and Near Eastern Studies*.

The Meritocracy Trap Daniel Markovits, 2020-09-08. A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy. It is an axiom of American life that advantage should be earned through ability and effort. Even as the country divides itself at every turn, the meritocratic ideal that social and economic rewards should follow achievement rather than breeding remains supreme. Both Democrats and Republicans insistently repeat meritocratic notions. Meritocracy cuts to the heart of who we are. It sustains the American dream. But what if both up and down the social ladder, meritocracy is a sham? Today, meritocracy has become exactly what it was conceived to resist: a mechanism for the concentration and dynastic transmission of wealth and privilege across generations. Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite. At the same time, meritocracy now ensnares even those who manage to claw their way to the top, requiring rich adults to work with crushing intensity, exploiting their expensive educations in order to extract a return. All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy's successes. This is the radical argument that Daniel Markovits prosecutes with rare force. Markovits is well placed to expose the sham of meritocracy. Having spent his life at elite universities, he knows from the inside the corrosive system we are trapped within. Markovits also knows that if we understand that meritocratic inequality produces near universal harm, we can cure it. When *The Meritocracy Trap* reveals the inner workings of the meritocratic machine, it also illuminates the first steps outward towards a new world that might once again afford dignity and prosperity to the American people.
