The objects in focus range from used clothing, scrap and waste materials to antiques and used cars, thrift stores and circular economies. Growing concerns with sustainability in the West have helped bring about the rediscovery of practices of clothing reuse, repurposing and recycling at the same time as major high street retailers are establishing programs to return used clothing to their stores for resale or recycling. As the contributions to this edited volume demonstrate, recent concerns with the fast pace and adverse effects of global commodity flows have increased the scholarly attention to secondhand economies both in terms of their history and their significance for livelihoods and sustainability. The chapters in this book were originally published as a special issue of the journal *Business History*. **Pandemic Pedagogies** J. Michael Ryan, 2023-01-31 *Pandemic Pedagogies: Teaching and Learning during the COVID-19 Pandemic* provides critical insights into the impact of the pandemic on the education system, pedagogical approaches and educational inequalities. Education is often touted as the best way to promote social mobility and produce informed members of society. The pandemic has significantly threatened those goals by temporarily disrupting education and exacerbating disparities in the education system. The scholarship in this volume takes a closer look at many of the issues at the heart of the educational process, including teacher self-efficacy, the gendered and racialized impacts of the pandemic on education, school closures and institutional responses. Drawing on the expertise of scholars from around the world, the work presented here represents a remarkable diversity and quality of impassioned scholarship on the impact of COVID-19 and is a timely and critical advance in knowledge related to the pandemic.
