World Economic Outlook, April 2013 International Monetary Fund. Research Dept.,2013-04-16 Global economic prospects have improved again but the bumpy recovery and skewed macroeconomic policy mix in advanced economies are complicating policymaking in emerging market economies Chapter 3 examines the prospects for inflation particularly because inflation was remarkably stable in the wake of the Great Recession and in fact has become less responsive to cyclical conditions Chapter 4 examines whether today s fast growing dynamic low income countries are likely to maintain their momentum and avoid the reversals that afflicted many such countries in the past **Reexamining Economic and Political Reforms in Russia, 1985-2000** Vladimir Gel'man,Dmitry Travin,Otar Marganiya,2014-06-25 Reexamining Economic and Political Reforms in Russia 1985 2000 Generations Ideas and Changes analyzes the impact of generational changes and ideational changes on major political and economic reforms conducted in Russia during the late twentieth century This book examines how the policy agenda was shaped by the ideas of the generations representatives for the sixtiers and seventiers Representatives of the generation of sixtiers conducted reforms from 1985 to 1991 and invested major efforts in political liberalization but did not pay enough attention to economic reforms On the other hand the reformers from the generation of seventiers who were in charge of policy making from 1991 to 1998 were genuinely oriented toward market building but rather insensitive to the democratization of the political regime This book explores how these differences in ideational agendas produced inconsistent and controversial outcomes from both stages of reforms Southeastern Geographer David M. A World More Concrete N.D.B. Connolly,2014-08-25 Many people characterize urban renewal projects and the power of eminent domain as two of the most widely despised and often racist tools for reshaping American cities in the postwar period In A World More Concrete N D B Connolly uses the history of South Florida to unearth an older and far more complex story Connolly captures nearly eighty years of political and land transactions to reveal how real estate and redevelopment created and preserved metropolitan growth and racial peace under white supremacy Using a materialist approach he offers a long view of capitalism and the color line following much of the money that made land taking and Jim Crow segregation profitable and preferred approaches to governing cities throughout the twentieth century A World More Concrete argues that black and white landlords entrepreneurs and even liberal community leaders used tenements and repeated land dispossession to take advantage of the poor and generate remarkable wealth Through a political culture built on real estate South Florida s landlords and homeowners advanced property rights and white property rights especially at the expense of more inclusive

visions of equality For black people and many of their white allies uses of eminent domain helped to harden class and color lines Yet for many reformers confiscating certain kinds of real estate through eminent domain also promised to help improve housing conditions to undermine the neighborhood influence of powerful slumlords and to open new opportunities for suburban life for black Floridians Concerned more with winners and losers than with heroes and villains A World More Concrete offers a sober assessment of money and power in Jim Crow America It shows how negotiations between powerful real estate interests on both sides of the color line gave racial segregation a remarkable capacity to evolve revealing property owners power to reshape American cities in ways that can still be seen and felt today

Cold War Workers Isabel Campbell, 2025-04-15 When Canada sought to protect its borders and aid its allies during the Cold War many people were recruited to build the emerging security state as construction and maintenance workers engineers members of the armed forces medical researchers and research subjects Security work transformed the lives of individuals families and communities in ways that were both predictable and surprising and both beneficial and harmful the militarization and colonization of Indigenous lives and lands was especially disruptive The opening essays of Cold War Workers intimately portray the complicated effects of Cold War labour upon Indigenous lives Elmer Sinclair a residential school survivor and member of the Canadian Armed Forces achieved equality with white men through his militarized masculinity His more positive professional experience contrasts with those of Indigenous workers on northern radar lines many of whom lost languages connections to the land and other elements of traditional cultures as they sought new skills and better employment Diverse Indigenous experiences of Cold War security work set the scene for the second set of essays which explore the impact of security preoccupations on marginalized groups the study of extreme isolation through scientific experimentation on human subjects the targeting of gay men with psychiatric labelling to enforce an idealized masculinity and the restriction of gender mobility in the Canadian military and the pushback from servicewomen Cold War Workers raises questions about the influence of settler colonial masculine institutional values on those who laboured for the Cold War state and society By comparing the experiences of different types of workers families and communities this volume reveals how race gender and privilege affected people in varied and sometimes unexpected ways

The Report: Oman 2014 Oxford Business Group, 2014-01-15 The sultanate s economy continues to enjoy the benefits of petroleum wealth which has provided budget surpluses in most years and served as a backbone for growth However planning is well under way for an era in which oil will not be the main economic driver with the twin goals of diversification and creating an increased number of private sector jobs at the top of the government s current agenda

Indeed in recent years the non OPEC oil exporter s economy has been undergoing a steady transformation reorienting from oil toward a more diverse set of service and industry based economic activities So far progress has been promising In 2011 oil and gas accounted for 38.8% of GDP With the continuation of higher than expected energy prices in 2012 the government has increased economic investments accordingly These investments which include infrastructure social programmes and small business development are aimed toward better preparing the country for its post fossil fuel future

The Palgrave Handbook of Global Approaches to Peace Aigul Kulnazarova, Vesselin Popovski, 2018-12-19 With existing literature focusing largely on Western perspectives of peace and their applications a global understanding of peace is much needed Spurred by more recent debates and discourses that criticize the dominant realist and liberal approaches for crises in contemporary state and peace building the contributors to this handbook emphasize not only the need to solve this eternal conundrum of humanity but also demand with the rise of increasingly more violent conflicts in international relations the development of a global interpretive framework for peace and security To this end the present handbook examines conceptual institutional and normative interpretive approaches for making building and promoting peace in the context of roles played by state and non state actors within local national regional and global units of analysis

Heritage, Affect and Emotion Divya P. Tolia-Kelly, Emma Waterton, Steve Watson, 2016-07-01 Heritage and its economies are driven by affective politics and consolidated through emotions such as pride awe joy and pain In the humanities and social sciences there is a widespread acknowledgement of the limits not only of language and subjectivity but also of visuality and representation Social scientists particularly within cultural geography and cultural studies have recently attempted to define and understand that which is more than representational through the development of theories of affect assemblage post humanism and actor network theory to name a few While there have been some recent attempts to draw these lines of thinking more forcefully into the field of heritage studies this book focuses for the first time on relating heritage with the politics of affect The volume argues that our engagements with heritage are almost entirely figured through the politics of affective registers such as pain loss joy nostalgia pleasure belonging or anger It brings together a number of contributions that collectively and with critical acuity question how researchers working in the field of heritage might begin to discover and describe affective experiences especially those that are shaped and expressed in moments and spaces that can be at times intensely personal intimately shared and ultimately social It explores current theoretical advances that enable heritage to be affected released from conventional understandings of both heritage as objects and objects as representations by opening it up to a range of new meanings emergent and formed in moments of encounter Whilst representational understandings of heritage are by no means made redundant through this agenda they are destabilized and can thus be judged anew in light of these developments Each chapter offers a novel and provocative contribution provided by an interdisciplinary team of researchers who are thinking theoretically about affect through landscapes practices of commemoration visitor experience site

project of socialist transformation Drawing on unpublished documents from Russian archives Perovi investigates the changes wrought by Russian policy and explains why from Moscow s perspective these modernization attempts failed ultimately prompting the Stalinist leadership to forcefully exile the Chechens and other North Caucasians to Central Asia in 1943 4
