Plimley,Maggie Bowen,2006-04-24 I liked the way it dealt with the difficult issues such as mental health sexuality and future employment in a clear and direct way providing well thought out practical responses Easy to read yet informative Very accessible in an area of SEN that is now a key area of concern Captivating good presentation with the case studies reflective oasis and points to remember Very useful for Sencos and teachers Judging Panel for NASEN TES Book Award There can be no doubt that the action suggested by the authors to improve outcomes for pupils with ASD would benefit the inclusion of all pupils Special Needs Information Press The book gives a clear insight into some of the issues which are important from the perspective of the pupil the challenges they face and the behaviours that can result It openly addresses the impact of these behaviours on a school and offers clear guidance and strategies The options given are realistic practical and achievable and the Reflective Oasis sections offer an ideal starting point for self evaluation and staff training Mike Ridout Head of Access and Inclusion Service Bridgend LEA All those involved in education at secondary level including senior managers and governors will find this concise book informative in helping them to understand the needs of their pupils with ASD Ian Attfield Advisory Teacher ASD Birmingham Specialist Support Service The book not only gives sound advice it helps the reader to find a wider range of sources of support and information a useful practical guide that makes the organisation of inclusive education achievable Special The book does have a number of useful strategies and tips but it provides more than just a list of practical points Support staff are encouraged to reflect upon their own practice and that of their school The book is well worth buying and should appeal both to support workers and their managers Support For Learning The book fills a niche by distilling and providing information to busy teachers an important little book that is quite readable and may be very useful to its intended audience American Psychological Association When a young person with autistic spectrum disorders enters secondary school there are lots of new factors to consider This books looks at making good transitions from primary school how to provide helpful INSET for colleagues including teachers senior managers support staff and lunchtime supervisors using a special interest as a tool for learning record keeping IEPs and sharing information across the school

subject disapplication and formal examinations social strategies to employ in a large high school useful tips for staff what to do and what not to do work experience careers and self advocacy The importance of working closely with parents is also covered as is dealing with challenging behaviour the book not only gives sound advice it helps the reader to find a wider range of sources of support and information The authors have not sought to minimise the difficulties or to pretend that schools and individuals will not have to change or adapt nor have they avoided difficult questions What they have one is to write a useful practical guide that makes the organisation of inclusive education achievable Resource File **Autistic**

Intelligence Douglas W. Maynard, Jason Turowetz, 2022-05-25 As autism has become a widely prevalent diagnosis we have grown increasingly desperate to understand it Whether through baseless blame on vaccination or struggles to determine the potential genetic origins of autism Americans have devoted a great deal of thought to what autism is and where it comes from In *Autistic Intelligence* Douglas Maynard and Jason Turowetz focus on a different origin of autism the diagnostic process By turning to diagnosis they ask us to begin with the basic questions of what norms we measure autistic behavior against why we understand autistic behavior as disordered and how we go about assigning that disorder to particular people The authors take a close look at a clinic in which children are assessed for and diagnosed with autism They spent hours in assessment evaluations with psychologists pediatricians parents and children and the resulting data enabled them to make plain the systems language and categories that clinicians rely upon when making their assessments Those diagnostic tools determine the kind of information doctors can gather about children and indeed those assessments affect how children act Autism is not a stable category they show but the result of an interpretive act And in the process of diagnosing children with autism they argue we miss all of the unique contributions they make the world around them *Good Reasons for Bad*

Feelings Randolph M. Nesse, MD, 2019-02-12 A founder of the field of evolutionary medicine uses his decades of experience as a psychiatrist to provide a much needed new framework for making sense of mental illness Why do I feel bad There is real power in understanding our bad feelings With his classic *Why We Get Sick* Dr Randolph Nesse helped to establish the field of evolutionary medicine Now he returns with a book that transforms our understanding of mental disorders by exploring a fundamentally new question Instead of asking why certain people suffer from mental illness Nesse asks why natural selection has left us all with fragile minds Drawing on revealing stories from his own clinical practice and insights from evolutionary biology Nesse shows how negative emotions are useful in certain situations yet can become overwhelming Anxiety protects us from harm in the face of danger but false alarms are inevitable Low moods prevent us from wasting effort in pursuit of unreachable goals but they often escalate into pathological depression Other mental disorders such as addiction and anorexia result from the mismatch between modern environment and our ancient human past And there are good evolutionary reasons for sexual disorders and for why genes for schizophrenia persist Taken together these and many more insights help to explain the pervasiveness of human suffering and show us new paths for relieving it by understanding individuals as
