Good Teacher Training Guide:

Gender, Management and Leadership in Initial Teacher Education Barbara Thompson, 2016-10-26 This book highlights the difficulties that women working as managers and leaders in initial teacher education face Teacher education is at the forefront of education reforms and yet little is known about the professional lives of those who work within it Whereas many women are moving into positions of authority in teacher training some existing women managers are being marginalized within new internally differentiated layers of managerial structures Yet other female managers mainly new appointees seem to endorse the discourses associated with new managerialist practices Simultaneously some women who manage in teacher training are engaged in a struggle for survival individually and professionally In the main men seem to be missing from authority positions and will conclude that in the current climate the management of teacher training is no job for a man

No-one Forgets a Good Teacher, 1998 *Challenges to Teacher Education in Difficult Economic Times* Joan Stephenson, Lorraine Ling, 2013-10-23 Teacher education in a financial crisis what are the consequences and how can probity be maintained Education like most other parts of everyday life is experiencing the challenges brought about by global financial constrictions This book presents the experiences and views of practising teacher educators from multiple countries and continents on how the melt down in world economics has affected and will continue to affect teacher education and concomitant experiences in schooling The ramifications are seen to extend into every aspect of teacher preparation continuing staff development and teacher support and there are significant implications for the quality of teaching and learning and the ethos and standing of the process of education as a whole Drawing on educational theory and social political and economic discourses the book addresses issues such as policy philosophy organisation funding resources modes of teaching and learning curricular change recruitment and retention amongst others and provides a snap shot across diverse contexts It aims to provide an evaluative analytical but reflective picture of teacher education in the light of the world economic crisis whilst exploring good practice and suggesting future strategies to develop the quality of teacher education and professional support teaching and learning The volume provides an insight into the need for a new paradigm for teacher education one that involves teacher educators in devising a discourse of positive and radical change It will be a valuable resource for teacher educators educational leaders policy makers educational commentators and teachers seeking to engage with the scholarship of teaching as a means to engage in continuous professional development Training of teachers Great Britain: Parliament: House of Commons: Children, Schools and Families Committee, 2010-02-09 Major reforms must be introduced to help newly qualified teachers make the transition from their initial training to their first teaching post The pressures on teachers at the start of their careers are considerable and the Committee calls for measures that reduce the front loaded nature of teacher training Much greater space and incentives for early career teachers to supplement initial training with a relevant masters qualification are vital Mentoring support for these teachers must be improved and extended

The Committee urges radical changes to teacher professional development including the introduction of a single overarching framework for the management of teachers career progression It says the Chartered Teacher framework would encompass a licence to practise and link pay and progression to the completion of a masters qualification and thereafter to completion of further accredited training Entry requirements for much initial teacher training provision are too low and the bar must be raised Reforms should include discontinuing undergraduate programmes for those wanting to be secondary school teachers which attract the poorest qualified candidates and requiring postgraduate trainees to have a lower second degree or above The Committee also says that supply teachers must be brought into the mainstream of the profession that in the context of the 14 19 reforms school and further education teachers should have much greater mobility across the two sectors and that the training of early years school and further education teachers should be harmonised through generic standards
