Women's Lives around the World Susan M. Shaw, Nancy Staton Barbour, Patti Duncan Ph.D., Kryn Freehling-Burton Ph.D., Jane Nichols, 2018-01-04 Providing an in depth look at the lives of women and girls in approximately 150 countries this

multivolume reference set offers readers transnational and postcolonial analysis of the many issues that are critical to the success of women and girls. For millennia women around the world have shouldered the responsibility of caring for their families. But in recent decades women have emerged as a major part of the global workforce balancing careers and family life. How did this change happen? And how are societies in developing countries responding and adapting to women's newer roles in society? This four-volume encyclopedia examines the lives of women around the world with coverage that includes the education of girls and teens, the key roles women play in their families, careers, religions, and cultures, how issues for women intersect with colonialism, transnationalism, feminism, and established norms of power and control. Organized geographically, each volume presents detailed entries about the lives of women in particular countries. Additionally, each volume offers sidebars that spotlight topics related to women and girls in specific regions or focus on individual women's lives and contributions. Primary source documents include sections of countries' constitutions that are relevant to women and girls, United Nations resolutions and national resolutions regarding women and girls, and religious statements and proclamations about women and girls. The organization of the set enables readers to take an in-depth look at individual countries as well as to make comparisons across countries.

Life by Algorithms Catherine Besteman, Hugh Gusterson, 2019-05-23. Essays on the downsides, dysfunctions, and dangers of automated decision making. An excellent survey of the algorithmically managed life. Choice. The phone systems that businesses use to screen calls. The link between student standardized test scores and public schools' access to resources. The algorithms that regulate patient diagnoses and reimbursements to doctors. The impenetrable corporate bureaucracy that can drive customers in need of help up the wall or drive them to suicide. The storage, sorting, and analysis of massive amounts of information have enabled the automation of decision making at an unprecedented level. Meanwhile, computers have offered a model of cognition that increasingly shapes our approach to the world. The proliferation of robo-processes is the result, as editors Catherine Besteman and Hugh Gusterson observe in this rich and wide-ranging volume, which features contributions from a distinguished cast of scholars in anthropology, communications, international studies, and political science. Though automatic processes are designed to be engines of rational systems, the stories in *Life by Algorithms* reveal how they can, in fact, produce absurd, inflexible, or even dangerous outcomes. Joining the call for algorithmic transparency, the contributors bring exceptional sensitivity to everyday sociality into their critique to better understand how the perils of modern technology affect finance, medicine, education, housing, the workplace, food production, public space, and emotions, not as separate problems but as linked manifestations of a deeper defect in the fundamental ordering of our society. *The Machine Stops*. E. M. Forster's 1909 science fiction story tells the tale of a human society collapsing when the technology upon which it has become dependent fails. Think

of this volume as *The Machine Starts* a collection of unsettling ethnographic accounts of the rise of algorithmic governance A necessary and sobering call to arms Stefan Helmreich Massachusetts Institute of Technology Contributors include Catherine Besteman Alex Blanchette Robert W Gehl Hugh Gusterson Catherine Lutz Ann Lutz Fernandez Joseph Masco Sally Engle Merry Keesha M Middlemass Noelle Stout Susan J Terrio **Private Secondary Schools 2014-2015**
