Alexander, Bernadette N. Jaworsky,2014-08-12

What is the source of Obama's power? How is it that after suffering a humiliating defeat in the 2010 mid-term elections, Obama was able to turn the situation around deftly outmaneuvering his opponent and achieving a decisive victory in the November 2012 presidential election? In this short and brilliant book, Jeffrey Alexander and Bernadette Jaworsky argue that neither money nor demography can explain this dramatic turnaround. What made it possible, they show, was cultural reconstruction. Realizing he had failed to provide a compelling narrative of his power, the President began forging a new salvation story. It portrayed the Republican austerity budget as a sop to the wealthy and Obama as a courageous hero fighting for plain folks against the rich. The reinvigorated cultural performance pushed the Tea Party off the political stage in 2011 and Mitt Romney became fodder for the script in 2012. Democrats painted their Republican opponent as a backward-looking elitist, a Bain capitalist whose election would threaten the civil solidarity upon which democracy depends. Real-world events can spoil even the most effective script. Obama faced monthly unemployment numbers, the daunting Bin Laden raid, three live debates, and Hurricane Sandy. The clumsiness of his opponent and his own good fortune helped the President, but it was the poise and felicity of his improvisations that allowed him to succeed a second time. Converting events into plot points, the President demonstrated the flair for the dramatic that has made him one of the most effective politicians of modern times. While persuasively explaining Obama's success, this book also demonstrates a fundamental but rarely appreciated truth about political power in modern democratic societies: namely, that winning power and holding on to it have as much to do with the ability to use symbols effectively and tell good stories as anything else.

Teaching Big History Richard B. Simon, Mojgan Behmand, Thomas Burke, 2015. Big History is a new field on a grand scale; it tells the story of the universe over time through a diverse range of disciplines that spans cosmology, physics, chemistry, astronomy, geology, evolutionary biology, anthropology, and archaeology, thereby reconciling traditional human history with environmental geography and natural history. Weaving the myriad threads of evidence-based human knowledge into a master narrative that stretches from the beginning of the universe to the present, the Big History framework helps students make sense of their studies in all disciplines by illuminating the structures that underlie the universe and the connections among them. Teaching Big History is a powerful analytic and pedagogical resource and serves as a comprehensive guide for teaching Big History as well for sharing ideas about the subject and planning a curriculum around it. Readers are also given helpful advice about the administrative and organizational challenges of instituting a general education program constructed around Big History. The book includes teaching materials, examples, and detailed sample exercises. This book is also an engaging first-hand account of how a group of professors built an entire Big History general education curriculum for first-year students, demonstrating how this thoughtful integration of disciplines exemplifies liberal education at its best and illustrating how teaching and learning this incredible story can be transformative for professors and students alike.

The UK Regional-National Economic Problem Philip McCann, 2016-03-10. In recent years, the United Kingdom has become a more and more divided society with inequality

between the regions as marked as it has ever been In a landmark analysis of the current state of Britain s regional development Philip McCann utilises current statistics examines historical trends and makes pertinent international comparisons to assess the state of the nation The UK Regional National Economic Problem brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK s economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government
