Catalano, 2015-09-28 If you're a librarian charged with collecting curriculum materials and children's literature to support the Common Core State Standards then this book is the only one that offers explicit advice on collection development in curriculum collections for you. While there are many publications on the Common Core for school librarians and K-12 educators, no such literature exists for curriculum librarians at the post-secondary level. This book fills that gap, standing alone as a guide to collection development for curriculum librarians independent of the Common Core State Standards (CCSS). The book provides instruction and guidance to curriculum librarians who acquire and manage collections so you can develop a collection based on best practices. The book begins with a primer on the CCSS and how curriculum librarians can support them. Discussion of the Standards is then woven through chapters arranged by content area that share research-based practices in curriculum development and instruction to guide you in curriculum selection. Material types covered include games, textbooks, children's literature, primary sources, counseling, and nonfiction. Additional chapters cover the management of curriculum collections, testing collections, and instruction and reference, as well as how to support and collect for special needs learners. Current practices in collection development for curriculum materials librarians are also reviewed. The book closes with a discussion of the future of curriculum materials.

*What's Hot in Literacy* Evan Ortlieb, Stephanie Grote-Garcia, Jack Cassidy, Earl H. **Multicultural Education of Children and Adolescents** G. Lea Lee, 2025-04-25 *Multicultural Education of Children and Adolescents* explores the foundations of diversity through cultural portraits of young people from a variety of backgrounds and provides practical strategies for shaping and implementing a multicultural curriculum. Content and features new to the seventh edition include the following: Every chapter opens with a real-life story that introduces the subject matter by showing the ideas in action. Points to Ponder boxes urge readers to reflect more deeply on information they have just read. Case Studies with accompanying Questions for Discussion in all chapters enable nuanced consideration of the crucial differences between culturally specific learning styles. Chapter 13 now includes a section on teaching and understanding LGBTQIA youth with updated teacher resources to support learning. The book addresses newly emerging issues in multicultural education throughout, including discussions around Critical Race Theory, culturally relevant pedagogy (CRP), the impact of the Black Lives Matter movement, the impact of xenophobia and hate towards Asian communities during the COVID-19 pandemic, as well as migration and refugee issues. Through a series of applied chapters, teacher candidates will learn to use the most effective instructional practices with diverse learners and to work successfully with families, school personnel, and administrators to implement a multicultural program.
