Insecure Guardians Zoha Waseem, 2022-08-19 The police force is one of the most distrusted institutions in Pakistan notorious for its corruption and brutality In both colonial and postcolonial contexts directives to confront security threats have empowered law enforcement agents while the lack of adequate reform has upheld institutional weaknesses This exploration of policing in Karachi Pakistan s largest city and financial capital reveals many colonial continuities Both civilian and military regimes continue to ensure the suppression of the policed via this institution itself established to militarily subjugate and exploit in the interests of the ruling class However contemporary policing practice is not a simple product of its colonial heritage it has also evolved to confront new challenges and political realities Based on extensive fieldwork and around 200 interviews this ethnographic study reveals a distinctly postcolonial condition of policing Mutually reinforcing phenomena of militarisation and informality have been exacerbated by an insecure state that routinely conflates combatting crime maintaining public order and ensuring national security This is evident not only in spectacular displays of violence and malpractice but also in police officers routine work Caught in the middle of the country s armed conflicts their encounters with both state and society are a story of insecurity and uncertainty **Handbook of Research on Teaching in**

Multicultural and Multilingual Contexts Charamba, Erasmos, 2022-06-24 Several factors have resulted in increased intra and inter state migration This has led to an increase in the enrollment of students with diverse linguistics backgrounds placing more academic demands on educators Linguistic diversity presents both opportunities and challenges for educators across the educational spectrum Language ideologies profoundly shape and constrain the use of language as a resource for learning in multilingual or linguistically diverse classrooms While English has become the world language most communities remain and are becoming more and more multicultural multilingual and diverse The Handbook of Research on Teaching in

Multicultural and Multilingual Contexts moves beyond the constraints of current language ideologies and enables the use of a wide range of resources from local semiotic repertoires It examines the phenomenon of language use language teaching multiculturalism and multilingualism in different learning areas giving practitioners a voice to spotlight their efforts in order to keep their teaching afloat in culturally and linguistically diverse situations Covering topics such as Indigenous languages multilingual deaf communities and intercultural competence this major reference work is an essential resource for educators of both K 12 and higher education pre service teachers educational psychologists linguists education administrators and policymakers government officials researchers and academicians Naval History ,2014 **Behind from the Start**

Lenette Azzi-Lessing,2017 Today there are nearly six million children under the age of 5 living in poverty in the world s richest country Behind from the Start examines what lies behind the stubbornly high rate of poverty among young children in the U S and its consequences It explains the multiple ways in which early life poverty robs millions of children of a promising future and calls for dramatic changes in how we approach this problem **Academic Languageing** Gisela

Ernst-Slavit,Margo Gottlieb,2025-06-20 Rethink how academic languageing can transform content area teaching For years the teaching of content based academic language to multilingual learners has focused on formulas vocabulary lists and sentence patterns often sidelining students linguistic and cultural strengths Gisela Ernst Slavit and Margo Gottlieb address these challenges by embracing academic languageing an active collaborative student driven process Academic Languageing offers strategies to integrate language and content learning while fostering student engagement voice and agency Dedicated chapters on academic languageing for Language Arts Mathematics Social Studies and Science highlight the dimensions of disciplinary language for each subject and provide strategies for moving learning forward with multilingual learners Additional features include Stop and Think prompts to help educators connect new ideas with their instructional settings Prompts at the end of each chapter to encourage deeper thinking and application of the material Multilingual examples to mirror the varied classroom settings in the U S and beyond The ultimate resource for educators committed to empowering multilingual learners and fostering meaningful culturally sustaining education Academic Languageing ensures multilingual learners comprehend academic content and thrive as confident autonomous drivers of their own learning *Speaking*

Truths Valerie Chepp,2022-02-11 The twenty first century is already riddled with protests demanding social justice and in every instance young people are leading the charge But in addition to protesters who take to the streets with handmade placards are young adults who engage in less obvious change making tactics In *Speaking Truths* sociologist Valerie Chepp goes behind the scenes to uncover how spoken word poetry and young people s participation in it contributes to a broader understanding of contemporary social justice activism including this generation s attention to the political importance of identity well being and love Drawing upon detailed observations and in depth interviews Chepp tells the story of a diverse group of young adults from Washington D C who use spoken word to create a more just and equitable world Outlining the

contours of this approach she interrogates spoken word activism's emphasis on personal storytelling and truth the strategic uses of aesthetics and emotions to politically engage across difference and the significance of healing in sustainable movements for change Weaving together their poetry and personally told stories Chepp shows how poets tap into the beautiful emotional personal and therapeutic features of spoken word to empathically connect with others advance intersectional and systemic analyses of inequality and make social justice messages relatable across a diverse public By creating allies and forging connections based on friendship professional commitments lived experiences emotions artistic kinship and political views this activist approach is highly integrated into the everyday lives of its practitioners online and face to face Chepp argues that spoken word activism is a product of and a call to action against the neoliberal era in which poets have come of age characterized by widening structural inequalities and increasing economic and social vulnerability She illustrates how this deeply personal and intimate activist approach borrows from builds upon and diverges from previous social movement paradigms Spotlighting the complexity and mutual influence of modern day activism and the world in which it unfolds Speaking Truths contributes to our understanding of contemporary social change making and how neoliberalism has shaped this political generation's experiences with social injustice

Voices from the Classroom: A Celebration of Learning Vana Chiou, Lotte Geunis, Oliver Holz, Nesrin Oruç Ertürk, Fiona Shelton, 2021 *Voices from the Classroom* illustrates that teachers have a leading voice in the policies that impact their students and the profession of teaching The aim is to provide a rich and broad view of the impact of inquiry in the classrooms from primary to higher education and to provide a window into the perspective of teachers *Voices from the Classroom* allows us to advance this mission by identifying and then turning educators' ideas into action The publication includes chapters on issues ranging from dyslexic students' geospatial abilities to teachers' differential behaviours related student characteristics and the experiences of refugees with bullying in the educational space All the contributions published in this book emerged from real classrooms our teachers and researchers conducted their research by drawing on their experience as educators We believe that these insights into everyday classrooms and the issues affecting them are crucial to making teaching and learning better We hope they can help drive real positive change for students and teachers

Prisons, Punishment, and the Family Rachel Condry, Peter Scharff Smith, 2018-10-04 Every year millions of families are affected by the imprisonment of a family member Children of imprisoned parents alone can be counted in millions in the USA and in Europe It is a bewildering fact that while we have had prisons for centuries and the deprivation of liberty has been a central pillar in the Western mode of punishment since the early nineteenth century we have only relatively recently embarked upon a serious discussion of the severe effects of imprisonment for the families and relatives of offenders and the implications this has for society This book draws together some of the excellent research that addresses the impact of criminal justice and incarceration in particular upon the families of offenders It assembles examples of recent and ongoing studies from eight different countries in order to not only learn

about the secondary effects and collateral consequences of imprisonment but also to understand what the experiences and lived realities of prisoners families means for the sociology of punishment and our broader understanding of criminal justice systems While punishment and society scholarship has gained significant ground in recent years it has often remained silent on the ways in which the families of prisoners are affected by our practices of punishment This book provides evidence of the importance of including families within this scholarship and explores themes of legitimacy citizenship human rights marginalization exclusion and inequality

Responsible Design in Applied Linguistics: Theory and Practice Albert Weideman, 2016-09-05 No mere history of applied linguistics this volume presents a framework for interpreting the development of applied linguistics as a discipline It offers a systematic account of how applied linguistics has developed articulating the philosophical premises that have informed both its emergence and its subsequent growth It asks questions that are seldom asked Where does the discipline derive from Where is it heading What directions has it already taken Which direction should it embrace in future What is the relative worth of all of the variation in design and methods that have been developed by applied linguists In defining applied linguistics as a discipline of design it takes us beyond the diffuse and sometimes contradictory conventional definitions of the field The framework of design principles it proposes not only helps to explain the historical development of applied linguistics but also provides a potential justification for solutions to language problems It presents us with nothing less than an emerging theory of applied linguistics

The Psychology of Magic and the Magic of Psychology Amir Raz, Jay A. Olson, Gustav Kuhn, 2016-11-18 Magicians have dazzled audiences for many centuries however few researchers have studied how let alone why most tricks work The psychology of magic is a nascent field of research that examines the underlying mechanisms that conjurers use to achieve enchanting phenomena including sensory illusions misdirection of attention and the appearance of mind control and nuanced persuasion Most studies to date have focused on either the psychological principles involved in watching and performing magic or neuromagic the neural correlates of such phenomena Whereas performers sometimes question the contributions that modern science may offer to the advancement of the magical arts the history of magic reveals that scientific discovery often charts new territories for magicians In this research topic we sketch out the symbiotic relationship between psychological science and the art of magic On the one hand magic can inform psychology with particular benefits for the cognitive social developmental and transcultural components of behavioural science Magicians have a large and robust set of effects that most researchers rarely exploit Incorporating these effects into existing experimental even clinical paradigms paves the road to innovative trajectories in the study of human behaviour For example magic provides an elegant way to study the behaviour of participants who may believe they had made choices that they actually did not make Moreover magic fosters a more ecological approach to experimentation whereby scientists can probe participants in more natural environments compared to the traditional lab based settings Examining how magicians consistently influence spectators for example can elucidate

important aspects in the study of persuasion trust decision making and even processes spanning authorship and agency Magic thus offers a largely underused armamentarium for the behavioural scientist and clinician On the other hand psychological science can advance the art of magic The psychology of deception a relatively understudied field explores the intentional creation of false beliefs and how people often go wrong Understanding how to methodically exploit the tenuous twilight zone of human vulnerabilities perceptual logical emotional and temporal becomes all the more revealing when top down influences including expectation symbolic thinking and framing join the fray Over the years science has permitted magicians to concoct increasingly effective routines and to elicit heightened feelings of wonder from audiences Furthermore on occasion science leads to the creation of novel effects or the refinement of existing ones based on systematic methods For example by simulating a specific card routine using a series of computer stimuli researchers have decomposed the effect and reconstructed it into a more effective routine Other magic effects depend on meaningful psychological knowledge such as which type of information is difficult to retain or what changes capture attention Behavioural scientists measure and study these factors By combining analytical findings with performer intuitions psychological science begets effective magic Whereas science strives on parsimony and independent replication of results magic thrives on reproducing the same effect with multiple methods to obscure parsimony and minimise detection This Research Topic explores the seemingly orthogonal approaches of scientists and magicians by highlighting the crosstalk as well as rapprochement between psychological science and the art of deception
